Statement by the Executive Authority

Mr RO Lamola, MP Minister of Justice and Correctional Services

This Annual Performance Plan (APP) has been developed against the backdrop of a health crisis with a severe economic crisis. Since the COVID-19 pandemic first hit South African shores in March 2020, it has spread throughout the country and claimed many lives. Businesses remain shattered, with job losses mounting across the nation. While the hazards of COVID-19 are growing worse, frontline workers continue to work tirelessly at great personal risk. Stories of sacrifice and loss, both personal and professional, are plenty on the country's frontline. South Africa's second surge, like many other countries, was worse than the first one that peaked in July 2020 due to the new SARS-CoV2 lineage, with multiple spike mutations, impacting the country's healthcare system. The surge of cases reported since December 2020, combined with the emergence of more contagious mutations, poses new challenges for South Africa in 2021.

President Cyril Ramaphosa outlined the pace, design and sequencing of Government's COVID-19 Vaccine Programme for South Africa during the State of the Nation Address (SONA) 2021. The Department has aligned its COVID-19 Vaccine Roll-out Plan for officials and inmates with the direction provided by National Government led by the Department of Health (DoH). The Department has established a COVID-19 Vaccine Roll-out Vaccination Committee (VROCC) guided by the Health Advisory Committee. COVID-19 vaccine roll-out training, based on training material issued from the DoH, have commenced across all Regions targeting relevant health care workers and officials, whilst inmates are being orientated on the vaccination roll-out. Health care workers in the Department have commenced with the self-registration on the Electronic Vaccine Data System (EVDS). Identified vaccinators and administrators have commenced with the training provided by the Department of Health on the EVDS.

The country must not let its guard down while the vaccine is rolled out, as it will take time for population immunity to be achieved. The physical environment of correctional facilities remains a risk due to inmates living in shared cells, and overcrowding that creates a challenge interms of social distancing. The Department has adopted and implemented a detailed COVID-19 Disaster Management Response Strategy across all correctional centres and offices to safeguard those remaining under our care. This response includes the consideration of special parole for selected, low-risk qualifying sentenced offenders who have or will reach their Minimum Detention Periods within five years in

8

line with Section 82 (1) of the Correctional Services Act (1998, as amended). We will continue to strive for a long-term, bold transformation of the criminal-legal system that prioritises community health and equity. The Department will remain vigilant and continue to exercise a risk-based approach to resuming operations, to ensure the health and safety of officials and vulnerable inmates. The COVID-19 Risk Adjusted Strategy and Standard Operating Procedures (SOPs) are strategic frameworks that will enable the Department to make transparent decisions based on a defined set of principles and utilising a risk management approach.

The indelible mark the pandemic will leave on economies, health and welfare systems as well as on society in general is profound. In ways small and large it has irreversibly changed our way of living and working together. In the South African context, the pandemic struck at a time when the country was already grappling with the persistent challenges of inequality, poverty and unemployment. The COVID-19 crisis is having an especially devastating impact on the livelihoods of the most vulnerable South Africans, including young people. The economic crisis induced by COVID-19 has resulted in many more people losing employment - many have gone without income for extended periods and many are going hungry every day. Inequality is expected to widen and poverty to deepen. Given the extent of the devastation, the economic response required should match or even surpass the scale of the disruption caused.

President Cyril Ramaphosa focused his SONA on four priorities for 2021, i.e. firstly, to defeat the COVID-19 pandemic; secondly, to accelerate economic recovery; thirdly, to implement economic reforms to create sustainable jobs and drive inclusive growth; and finally, to fight corruption and strengthen the State. The country has an opportunity to imaginatively, and with a unity of purpose, reshape its economic landscape as it confronts the devastating effects of COVID-19. Building a new, inclusive economy that benefits all South Africans will afford a permanent and decisive break from the low and declining growth, falling per capita incomes, low investment, as well as high and deeply entrenched levels of inequality, poverty and unemployment. There is an opportunity for a significant nationwide expansion of alternatives to incarceration and detention, and impactful reform of the justice system. Committing to restorative justice and implementing reforms will restructure the justice system, reduce the burden on the taxpayer and extend the compassionate action that has been a rallying point during COVID-19. Permitting people to earn accelerated discharge off community supervision will responsibly shrink the number of people subjected to such supervision, and allow Government to concentrate the finite resources on those who are most in need of attention.

The COVID-19 crisis poses an additional threat to the food security of millions of South Africans who were already food insecure before the outbreak of COVID-19. In the long run, the combined effects of the crisis could disrupt the function of food systems. Such a disruption could result in consequences for health and nutrition of a severity and scale never seen in more than half a century. To place the economy on a new trajectory, the Economic Reconstruction and Recovery Plan promotes massive growth in local production and competitiveness of South African exports. An increase in imports means fewer jobs in South Africa, as does the decrease in exports. The Department supports the localisation principles within the Economic Reconstruction and Recovery Plan by pursuing self-sustainable corrections. Resources in correctional facilities are directed towards self-produced food, garments, shoes and production workshop products that are supplied to government departments for income generation, maintenance of the correctional facilities, whilst transferring market related skills to offenders. The Department will spare no efforts to enhance production performance of production workshops, bakeries and farms. To this end, the Department will prioritise a Business Case that will determine the most suitable mechanism for revenue generation and retention. These production units promote the transfer of skills to offenders by complementing skills development programmes and improving personal as well as social functioning. This particular form of rehabilitation has various benefits for both offenders enrolled in such programmes as well as for the correctional system.

Skills development is critical not only in driving South Africa's economic recovery, but also in sustaining it. Given the problem of the skills mismatch that is characteristic of the South African labour market, there is a risk that as the use of technology improves, many workers would be left behind. Therefore, there is a need to manage this transition with a view of ensuring that it does not lead to massive job losses. In this regard, opportunities for the reskilling and retraining of offenders will be expanded in support of Priority Three: Education, skills and health of the Medium Term Strategic Framework (MTSF). Working with the Sector Education and Training Authorities (SETAs), industry and Technical and Vocational Education and Training (TVET) colleges the production of artisans with the required skills and competencies will be up-scaled. Workplace and industry training will also be leveraged on to support the drive to build and strengthen the required skills base. This will provide offenders with a variety of useful vocations, and help them improve their self-esteem, decision-making capacities, and confidence in their future. Importantly, these vocations will increase their employability and offer them better work prospects, or better entrepreneurial skills to support them in the case of self-employment.

Formerly incarcerated individuals with low levels of education often find themselves without the financial resources or social support systems upon their release from correctional facilities and therefore are more vulnerable to committing criminal acts rather than becoming reintegrated into society. While incarcerated young adults face significant barriers to entering the labour market they also have a lot to gain from educational opportunities while in correctional facilities. Investing in formal education rather than increased incarceration will also benefit the economy. For any individual, not having a National Senior Certificate (NSC) closes doors to higher education, training, and employment opportunities. For formerly incarcerated individuals, the disadvantage of not completing Grade 12 is compounded by the myriad barriers to successful reintegration and additional stigma they face as they re-enter their communities and the workforce.

While investing in formal education programmes will require upfront funding, the long-term economic benefits for the country and the economy are considerable. This will put more money back into pockets of taxpayers and help previously incarcerated individuals become stronger players in the market through taxes and purchasing power — and more self-sufficient citizens less reliant on Government programmes. Correctional facilities with education and training programmes have created a safer environment for both incarcerated individuals and officials. While providing opportunities for incarcerated individuals to earn a NSC and eventually higher education gualification may not fix all the systemic issues seen within the Criminal Justice System, education seems like a better use of limited resources when taking into consideration the high incarceration costs that exists across the country. Education is considered "the great equalizer," but this only works if the most vulnerable individuals have access to it. From both a moral and logical perspective, cutting incarceration costs by investing in education provides the greatest benefit to society as a whole, and ensures that all people, regardless of their past, are given an opportunity to thrive in the future.

The Department has identified the need to increase the number of potential work opportunities for offenders, some of which will require partnerships with civil society organisations and other government departments. Rehabilitation and reintegration programmes will continue to be strengthened by, among others, ensuring that it is adequately capacitated, professionally staffed and resourced. Alignment with the District Development Model will be strengthened and deepened to ensure better coordination, planning and delivery of services. Creating a conducive environment and reducing the cost of delivering services are some of the critical enablers of the economic recovery and reconstruction effort.

The COVID-19 pandemic has created unprecedented barriers to the already difficult process of parolees navigating their return to society. Out-of-work parolees now find themselves among a flood of the newly unemployed people, many without the burden of a criminal history. COVID-19 has also laid bare the frailties in the labour market; with certain jobs more secured than others. The problem posed by parolees being released from correctional facilities and struggling to make successful transitions is not a new challenge. What is new, though, is the scale of the current problem. Socio-economic factors play an important role in determining successful reentry outcomes. After release, the problems of lack of employment and lack of meaningful connection with the community can persist. The Department will continue to pursue partnerships with relevant stakeholders to enhance the employability of parolees. The Restorative Justice process provides a platform for forgiveness between the offender and the victim. It is important that re-entry preparation begins on the first day of incarceration and continues without disruption into the community. Improving the experience of victims of crime in the criminal justice process is a continuing priority for the Department. A range of approaches and flexibility in justice system responses is required; but all must be grounded in dignity, courtesy and respect. Victims cannot be shut out of key decisions and information - they require more accountability from, and more participation in, the Criminal Justice System.

The Department is in its final stages of consultation on the review of the current Parole Administration System with a view to improve the considerations, placement and release system. This will include all processes related to the placement and release of offenders and will include but not be limited to the Case Management Committees; related functions of the Head of Centre, Correctional Supervision and Parole Boards (CSPBs); Medical Parole Advisory Board (MPAB); the Correctional Supervision and Parole Review Board; foreign nationals, the consideration and decision making process for Lifers; and placement and release process. The reviewed Parole System will improve the consistency and quality of parole decisions, ensure greater compliance with the provisions of the Promotion of Administrative Justice Act (Act No. 3 of 2000) and to increase public transparency and participation in the parole processes. The potential gains from the review of the parole administration system will also improve the recruitment and retention of skilled professionals such as criminologists and psychologists to improve placement and release considerations, victim and community participation and empowerment with a more proactive stance to ensure their involvement in parole considerations.

The Department is managing approximately 242 correctional facilities (excluding the two private correctional facilities) and 218 community corrections offices that provide services to inmates, parolees, probations and other persons placed under the correctional system. There is a considerable diversity in terms of size, minimum standard and guality of facilities across the country. These facilities are accessed and utilised by various stakeholders including service providers, incarcerated offenders, and remand detainees, families of the offenders, governmental officials and oversight bodies. The current reactivate approach to maintenance of facilities has compromised the optimal utilisation of correctional facilities. The Department has appointed implementing agents to enhance the planning and implementation of the infrastructure programme. The implementation of the own resources programme (using offender labour) to conduct first line general maintenance of facilities will be prioritised in all regions.

The MTSF Priority One: Building a capable and ethical State requires us to improve the efficiency of spending, eliminate wastage and corruption and not unduly burden the constrained fiscus. Corruption has had a negative and profound impact on the ability and capability of the State to deliver. It has reached alarming levels, and emboldened acts of corruption over time have eroded public trust in the ability and capability of the State to deliver services to South Africans. The Department will intensify efforts to deal with corruption given that it also has the potential to undermine the capacity of Government to drive the delivery of services and support growth and development. To this end, a zero-tolerance approach building on ongoing work will be taken, and relevant law enforcement capacity and speedy resolution will be aggressively enhanced in order to decisively deal with corruption or maladministration.

The Department will continue with efforts to further improve the audit outcomes over the medium-term. Internal controls for procurement processes, procedures and contract management will be strengthened to address the root causes of irregular expenditure. Investigations are being fasttracked to determine liability of any official and the appropriate action will be taken against officials for any transgressions. Consequence management has become mandatory for all transgressions within the Department and will be enforced going forward to ensure good governance and to comply with all Batho Pele principles. The Department will also ensure that application systems are not susceptible to compromised data integrity. The new microorganisational structure will streamline business operations and improve decision making processes to support a clean audit outcome.

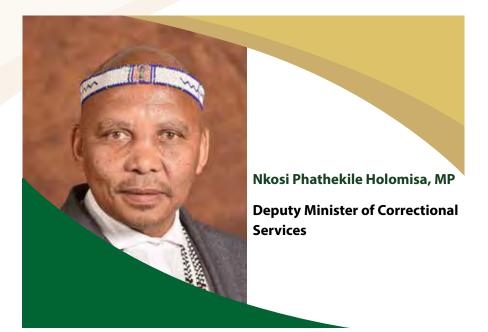

Government's response to the COVID-19 pandemic revealed the capability and capacity in co-ordination and execution. Despite the challenges in addressing the COVID-19, the crisis will pass. Rejuvenating the economy and rebuilding society requires our collective focus to accelerate inclusive economic growth and employment. The COVID-19 pandemic has unleashed changes that seemed unthinkable a year ago with profound implications for the world. The use of technology has taken centre stage in all economic sectors. The ability to deploy computing power, bandwidth, the cloud and cyber-security will define our success. This will depend on continuous business model innovation with agile and open collaboration. At the same time, the pandemic has put human welfare and sustainability front and centre. Building a better world beyond COVID-19 requires us to imagine the unthinkable.

It is vital that we also use the experience to make the 'new normal' in favour of the environment and ensure that no one is left behind. The strategic period will be an important time for the Department as it responds to the myriad challenges and focuses on the opportunities available to make a fundamental difference in the lives of all South Africans. I would, therefore, like to express my appreciation to Management and officials within the Department for their hard work in finalising the Annual Performance Plan. I would like to commit myself and the Department to the effective implementation of the 2021/22 Annual Performance Plan.

Mr RO Lamola, MP

Minister of Justice and Correctional Services

Statement by the Deputy Minister

The coronavirus outbreak has plunged the world into uncharted territory, causing devastation globally to peoples' lives and the economy. The establishment of the South African COVID-19 Modelling Consortium, through the National Institute for Communicable Diseases (NICD), has been key to projecting the spread of the disease to support policy and planning in the country. It was through this intervention and other scientific knowledge locally and internationally that the National Coronavirus Command Council was able to navigate through the COVID-19 period and implement the risk-adjusted approach, guided by conditions such as the level of infections and rate of transmission, capacity of health facilities, extent of the implementation of public health interventions and the economic and social impact of continued restrictions. Despite the immense damage brought on by the pandemic, it is believed that the rate of infection would have been far worse without Government's interventions. This year, Government will roll out a massive unprecedented vaccination programme to save lives, get individuals working and the economy of the country growing again.

In this Annual Performance Plan, the Department has taken into consideration the effect that the pandemic had over the past year. While the consequences of the COVID-19 pandemic are still unclear, it is certain that they are a profound shock to the systems underpinning contemporary life. It is important to note that although the vaccine rollout has commenced it does not mean that there will be an immediate eradication of COVID-19. The vaccine is being prioritised for those populations who are considered to be the most impacted as advised by the National Department of Health. To this effect, the Department has put in place a COVID-19 Vaccine Roll-out Plan that has two phases, i.e. phase one that includes all health care workers and phase two that will include essential workers, persons in congregate settings, persons over sixty years of age and persons under eighteen years with comorbidities. The new dominant COVID-19 variant (501Y.V2) in our country, is likely to have significant implications for the pace, design and sequencing of our vaccine programme. This means that in the immediate and longer term, social distancing, hand washing, hygiene, wearing of masks, are all interventions that will still need to continue in order to maximise the protection of officials and inmates within correctional facilities.

One of the challenges experienced during the lockdown of correctional facilities was the increase in the number of escapes. This was largely attributed

to the limited functioning of the courts, the halting of all rehabilitation activities within correctional centres, resulting in idleness among inmates, as well as the anxiety among officials and inmates during searching, as the social distancing principle had to be observed at all times. It was undoubtedly a learning experience to speedily revamp our security and technology systems in preparation for similar settings in the future. As part of the integrated security systems approach, our security improvements will include the implementation of security technology systems at correctional centres and the mounting of the Back-to-Basics campaign. In the coming financial year the implementation of the mesh network and Integrated Security Systems (ISS), as well as the installation of network infrastructure and information systems, will be accelerated. As we roll out identified technologies across the Department, we shall embark on the security training of our officials to detect and confiscate contrabands speedily, reduce violence and the commission of further crimes. Consequence management measures will be put in place to ensure that officials found complicit in the commission of these crimes are dealt with in a manner befitting the criminal activities in which they involve themselves.

As part of the Justice, Crime Prevention and Security (JCPS) Cluster, the Department will continue working in tandem with relevant stakeholders to achieve its objectives of reducing crime, improving the efficiency of the criminal justice system, dealing with corruption and prioritising the fight against and prevention of cyber-crimes. A number of specialised teams and structures are established to implement various solutions to deal comprehensively with safe custody in our correctional facilities. We continue to explore appropriate solutions in partnership with cluster departments, as well as other stakeholders, to work together with us in the rehabilitation and reintegration of offenders, parolees and probationers. We are also looking at strengthening the implementation of existing prescripts to achieve our security objectives, including amendments to legislation and policies. We are committed to ensuring that the safety of victims is always the primary concern in any decision regarding pre-trial detention or release.

holistic and coordinated response to overcome the challenge of overcrowding. It remains a challenge that continues to stretch resources, hampering efforts of rehabilitations and ultimately contribute to escapes, injuries and unnatural deaths within our facilities. We have noted a significant reduction in overcrowding compared to previous years. However, this remains a challenge that we can only overcome through coordination of strategies within the JCPS and Social Clusters. The use of the Audio Visual Remand (AVR) systems in our courts is one of the measures administered in collaboration with the Department of Justice and Constitutional Development to curb overcrowding. Going forward the Department of Justice and Constitutional Development will ensure that the AVR system is optimised, in order to expedite the process of postponing cases and releasing remand detainees on bail for individuals detained for minor offences. The completion of Tzaneen and Nggamakhwe correctional facilities, as well as the construction of Emthonjeni Youth Centre, Parys and Brandvlei correctional facilities over the MTEF period, exemplify the efforts made towards a reduction of overcrowding and the creation of conducive conditions for humane incarceration. As the Ministry, in line with our commitment to fight the challenge of overcrowding, we are in the process of taking back the Libode Correctional Centre, which was given back to the Department of Public Works and Infrastructure (DPWI) upon completion of renovation works, which in turn was handed over to the South African Police Service by the DPWI. These strategies will ensure that the effectiveness of rehabilitation programmes, including educational and vocational training, as well as recreational activities, are not compromised by overcrowding in our correctional facilities. The Social Reintegration Programme provides offenders with the assistance and supervision that they may need to successfully reintegrate into the

community and to avoid a relapse into criminal behaviour. The Department will work together with

The causes of overcrowding are not only the result

of the scope of the Criminal Justice System, but

penetrate to other socio-economic policies such

as the lack of education, inadequate social welfare,

abject poverty and joblessness. We therefore need a

relevant partners to strengthen the Restorative Justice Programme to ensure that more victims of crime are well prepared to participate in these programmes, with the view to find closure and repair the damage caused by crime. The Victim Offender Dialogue (VOD) and the Victim Offender Mediation (VOM) programmes provide a safe platform to victims and offenders, as well as communities, to talk about the impact of the offenders' criminal actions. These programmes also create a conducive setting for the offenders to ask for forgiveness and offer some form of restitution for the crimes committed. We will ensure continuous implementation of the Restorative Justice Programme while observing the necessary COVID-19 protocols. Implementation of the Restorative Justice Programme will include the views of traditional leaders as well as other elements of our African culture for inclusive participation.

The Department will strengthen relationships with stakeholders involved in community initiatives and projects. Offender labour will continue to be utilised to assist with repair and renovation works, agricultural and community related projects. The production workshops will continue to provide skills and create conducive grounds for work opportunities for exoffenders. In this respect, many offenders will emerge from correctional centres with the necessary knowhow on self-sustenance, self-reliance, being attractive to jobs opportunities, with possibilities of becoming job creators through the businesses that they might open, based on their skill sets. The forging of closer links and cooperation between the Department, the community and other government departments is crucial in the fight against crime.

The review of the current Parole Administration System will be finalised with a view to improve the considerations, placement and release systems. This will include all processes related to the placement and release of offenders. Such processes will deal with, inter alia, the Case Management Committees, related functions of the Heads of Centre, Correctional Supervision and Parole Boards (CSPBs), Medical Parole Advisory Board (MPAB), the Correctional Supervision and Parole Review Board (Review Board), inmates who are foreign nationals, the consideration and decision making process for offenders serving life sentences. The functioning of the Parole Boards is regulated and administered in terms of Chapter VII of the Correctional Services Act, 1998 (Act No. 111 of 1998), but they function independently in terms of their decision making competency. This will ensure improvements within the parole system, intensive monitoring of parolees and probationers, as well as the provision of social and psychological support.

The extensive fiscal constraints facing the country, due to our low economic growth, have detrimental effects on the Department's budget over the MTEF period. In strengthening our human resource capacity, we will undertake to implement a uniform shift pattern system in all correctional facilities, to ensure that there is adequate capacity to swiftly carry the mandate of the Department, whilst maintaining a healthy workforce. The President of the Republic of South Africa, Mr Cyril Matamela Ramaphosa, in his 2021 State of the Nation Address directed us to implement economic reforms to create sustainable jobs and drive inclusive growth. This will be supplemented by prioritising recruitment at the coalface with a focus on youth employment in the filling of vacancies within the Department. The inclusion of designated groups will be prioritised to ensure that they become active participants in the economy, by ensuring that the prescribed percentage of tenders will be awarded to them.

The COVID-19 operating environment has magnified the prominence of technology within the workplace. The digital transformation will be prioritised in line with the Fourth Industrial Revolution (4IR) in the automation of business processes, through the implementation of the Master Information Systems and Security Technology Plan (MISSTP) in relation to the Department's Vision 2068. A critical aspect that comes with technology is to ensure that access to the correctional facilities is controlled, including access to our data as cyber threats are part of the technological space. This will be achieved through the upgrading of our operating systems, backups and firewalls and modernisation of our databases for business intelligence and smart data analysis. Though the economic recovery is going to be gradual, we will recover and emerge even stronger than before. We are working to ensure that the lives of the officials, inmates and the community slowly return to normal, even if gradually.

I would like to acknowledge the leadership of the Minister of Justice and Correctional Services, Honourable Mr Ronald Ozzy Lamola, in guiding us through these unprecedented times. This Annual Performance Plan demonstrates the commitment and focus of the Department under the management of the National Commissioner, Mr Arthur Fraser, and his team, on protecting the health and safety of inmates, correctional officials and society as a whole. Management and staff are called upon to work together with relevant stakeholders to implement this 2021/22 Annual Performance Plan, for a successful realisation of safe and empowered communities, through sustainable economic development.

Nkosi Phathekile Holomisa, MP Deputy Minister of Correctional Services

Statement by the National Commissioner

The 2021/22 Annual Performance Plan for the Department of Correctional Services considers the overwhelming, competing challenges and uncharted waters we face as we continue to navigate the impacts of the COVID-19 pandemic. The damage caused by the pandemic to an already weak economy, to employment, to livelihoods, to public finances and to State-owned companies has been colossal. This requires us to be predictive and proactive in our decision-making to preserve business continuity and build resilience within the Department. Finding ways to reimagine a business-as-usual environment that minimises disruptions for the Department requires a fine balance.

The COVID-19 lockdown in South Africa, one of the strictest in the world, dealt a severe blow to an already ailing economy and many livelihoods have been lost as a result. Reigniting the economy will be the defining Government challenge of our time. Government must find an appropriate middle-ground between a rapid economic rebound and risking public health and potentially subsequent lockdowns. His Excellency President Matamela Cyril Ramaphosa's Economic Reconstruction and Recovery Plan outlines a selection of specific priority interventions that would swiftly kick-start change and a rapid economic rebound. The objectives of the plan is to create jobs, primarily through aggressive infrastructure investment and mass employment programmes; to reindustrialise our economy, focusing on growing small businesses; to accelerate economic reforms to unlock investment and growth; to fight crime and corruption; and to improve the capability of the State. The Department, together with the JCPS Cluster, will discharge its responsibility to support the plan in line with its mandate.

The Department recorded a daily increase in the number of new positive COVID-19 cases during January 2021 similar to the patterns observed in the rest of the country. Selected correctional facilities were placed under strict lockdown, as part of the Department's COVID-19 Risk Adjusted Strategy, in an effort to contain further spread of infections. The newly-detected variant of the COVID-19 virus was the main contributing factor in driving up the number of new cases, hospitalisations and deaths. Although the country has recorded a steady decrease in new COVID-19 cases after a severe second wave. scientists cautioned that a third and even fourth wave is looming, therefore it is critical that all individuals continue with strict adherence to nonpharmaceutical interventions which include physical distancing, wearing of masks and frequent washing of hands with soap and water or regular sanitisation of hands to minimise the impact of COVID-19. The Department is working closely with the DoH in the development of a COVID-19 Vaccine Roll-out Plan for officials and inmates. Recognising that COVID-19 is still part of everyday life as well as the environment in which we operate, the Department will continue to ensure the strict observance of prevention and protection measures supported by regular screening and testing within our facilities.

The smuggling of illicit items such as drugs, cigarettes and cell phones into correctional facilities continues to be a significant problem for the Department. Contraband undermines the integrity of the correctional system and creates a danger for both officials and inmates. The strict COVID-19 lockdown of correctional facilities has revealed that often the people doing the smuggling are correctional officials, who accept bribes from inmates. One strategy to combat contraband smuggling that is being implemented is the requirement for officials to undergo searches when entering the facility. Security in correctional facilities is ensured by physical means of security, procedural means, which are procedures that must be followed, and dynamic security, which requires alert officials who interact with inmates in a positive manner and engage them in constructive activities, to anticipate and prevent problems before they arise. A proper balance should be maintained between the physical, procedural and dynamic security in the case of all inmates, including high-risk inmates. The right balance to prevent escapes and maintain order will depend on a number of factors such as the condition of the correctional facilities, the level of technology available, the number of officials and type of inmates within our facilities.

The Department will conduct a review of the training manual on gang management to build knowledge and develop an effective response improvement strategy in the management of gangs. In light of the COVID-19 environment, a work-study will be conducted for the procurement of suitable working attire for officials dealing directly with the public and inmates to increase the confidence of officials in performing their duties optimally. This will assist to directly respond to the increased security incidents that were noted in the previous year. Security of inmates remains a critical focus area for the Department and as a result tackling issues such as overcrowding, gangsterism and smuggling of contraband will, indeed, lead to improved conditions within our correctional facilities.

The Department is opposed to any form of violence against women and children. The reported incidences of Gender-Based Violence (GBV) taking place within correctional facilities are worrisome. This kind of abuse is a clear violation of human rights, as well as the protection granted to inmates under South Africa's Bill of Rights. Working collectively with other Government departments, partners and relevant stakeholders, including society and communities, the Department is committed to ending the normalisation, tolerance and minimisation of violence and harm inflicted on women and children. This will include developing and evaluating rehabilitation programmes for offenders of different types of violence against women that prioritise the safety of the victims. Assessing the differential impact of security measures when detaining men and women, boys and girls, as well as individuals of diverse gender identity and sexual orientation will create humane, safe and orderly facilities that maximise the chances of successful rehabilitation.

The Department will continue to implement its multipronged strategy to reduce overcrowding although it is widely recognised that the solution to overcrowding does not reside solely with Correctional Services. Successful strategies to reduce overcrowding are based on an integrated and sustained approach to enhancing the criminal justice process and are strengthened by an in-depth understanding of the nature of the problems in society, the effective functioning of the Criminal Justice System and general strategies for crime prevention. Crime is a complex issue that may stem from many sources. The prevention of crime requires individuals, communities, businesses, non-government organisations and all levels of government to work together in a coordinated way to develop and implement effective strategies to address the short and longer-term causes of crime.

The Department has committed itself to the humane custody and rehabilitation of offenders before placing them back in society. All educational and skills development programmes are implemented through the observation of COVID-19 regulations to ensure that offenders actively participate in the required rehabilitation initiatives upon their release. The impact of rehabilitation programmes therefore remains a strategic focus for the Department. The Department will increase participation from 80% to 90% of offenders participating in long occupational skills programmes, short occupational skills programmes and TVET College programmes during the MTEF period. The offenders participating in General Education and Training (GET), Further Education and Training (FET) and National Senior Certificate (NSC) will be maintained in line with the offender population growth trends.

Offenders, irrespective of gender and age, are exposed to skills training including building and plastering, welding, painting, plumbing, vegetable production and other farming-related training interventions. The overall objective of these activities is to assist offenders in their effort to rehabilitate and successfully reintegrate into society and to become productive members of society without relapsing into reoffending. The training of offenders in various skills is coherent with the skills needed in various municipal districts to strengthen the local economy. The Department will use these skills to strengthen the implementation of self-sufficiency and sustainability strategy and provide offenders with much-needed work experience in preparation for their release.

Government had called on all institutions to "create pathways for young people in the economy". The youth make up the majority of South Africa's population but the greatest challenge that confronts South Africa is the youth unemployment. COVID-19 has imposed further challenges on youth employment as both public and private sector strive to reduce the wage bill. Regardless of the situation, the Department is committing to employ 20% of the youth in filling of the vacancy rate. This will allow them to receive active support and work readiness training to increase their employability and match themselves to opportunities. The Department has first-hand experience with this challenge as the majority of offenders are young people who have committed crimes. Youth unemployment will also be addressed by facilitating economic opportunities for offenders, parolees and probationers and increasing the participation of parolees and probationers participating in community initiatives over the MTEF to ensure that that their skills and trades remain relevant. These developmental opportunities will be made available by the Department in collaboration with other Government departments, the private sector and civil society will contribute to giving them a second chance to become law abiding citizen upon their release.

We remain firm in our commitment to ensure effective social reintegration with greater involvement from victims, families and communities. In order to improve victim and community participation at various stages of corrections the Department will continue to implement its Victim Offender Mediation (VOM) and dialogue initiatives. For every crime there is a victim, and the greatest impact of crime is felt by victims and communities. The stance of the Department is that parole considerations of offenders serving sentences for crimes listed in section 299A of the Criminal Procedure Act 51 of 1977 or victims of any other crime where the Parole Board requests or receives a victim representation should include victim participation, despite the challenges encountered in tracing some victims. The process of restorative justice will be implemented with some restrictions, in line with COVID-19 Regulations, to ensure the participation of victims and offenders. The Annual Performance Plan, however, cannot be set in stone. The recovery is likely to be volatile and uneven. As a result, the Department must develop a resilient and adaptive strategy for correctional centres and community corrections, allowing for adjustments as events unfold and new information emerges.

The Department's performance in the previous financial year has been significantly reduced by the COVID-19 pandemic. Staffing shortages stretching back many years and strains on correctional medical facilities have been amplified under the current circumstances. The Restorative Justice Programme was suspended between the Alert Level Five and Alert Level Two lockdowns, no Izimbizos were held and contact sessions with parolees/probationers could not be conducted effectively throughout the year. Performance has improved gradually with the easing of lockdown restrictions and with some operational adjustments aligned to the COVID-19 environment. During the 2019/20 audit process, the Department received a qualified audit outcome due to the incomplete disclosure of irregular expenditure. The Department is committed to reviewing of the irregular expenditure; ensuring completeness of registers and disclosures on the Annual Financial Statements, and finalising the reconciliation of the bedspaces to avoid recurring audit findings.

Once we reach the other side of this pandemic, it will be important to establish long-term strategies for greater resilience and to apply lessons learned from the experience to create a systems and talent roadmap that better prepares the Department for future disruptions. This requires greater coordination and integration to ensure that our outcomes are achieved with the limited fiscal capabilities at our disposal. I would like to thank the Minister of Justice and Correctional Services, Mr RO Lamola, Deputy Minister of Correctional Services, Nkosi SP Holomisa, the Portfolio Committee on Justice and Correctional Services, the Standing Committee for Public Accounts as well as the officials of the Department for their commitment and dedication in finding lasting solutions for a safer society.

Mr A Fraser

National Commissioner Department of Correctional Services

Official sign-off

It is hereby certified that this 2021/22 Annual Performance Plan:

- a) Was developed by the management of the Department of Correctional Services under the guidance of Minister RO Lamola, MP.
- b) Takes into account all the relevant policies, legislation and other mandates for which the Department of Correctional Services is responsible.
- c) Accurately reflects the Impact, Outcomes and Outputs which the Department of Correctional Services will endeavour to achieve over the period 2021/22.

Chief Deputy Commissioner: Strategic Management

Mr DKN Ligege Chief Financial Officer

Mr KJ Katenga

Mr JM Mkabela Chief Operations Commissioner

Part A Our Mandate

1. Updates to the Constitutional, Legislative and Policy Mandate

There are no updates to the Constitutional, Legislative and Policy Mandates for the Department. The mandate as stated in the 2020-25 Revised Strategic Plan remains as:

1.1 Constitutional mandates

The Constitution of the Republic of South Africa, 1996 (Act No. 108 of 1996, as amended) enshrines the democratic values and principles that govern public administration. The Bill of Rights, as contained in the Constitution, is the foundation of democracy in South Africa that enshrines the rights of all people in the country and affirms the democratic values of human dignity, equality and freedom. The Constitution, which lays the basis for the mandate, compels the Department to comply with relevant sections in terms of the treatment of inmates and principles governing the public administration.

1.2 Legislative mandates

The Department is bound by all legislation passed in South Africa; however, the following acts constitute the most frequent applications of the legal framework within which the Department functions:

- (a) Correctional Services Act, 1998 (Act No. 111 of 1998, as amended).
- (b) Criminal Procedure Act, 1977 (Act No. 51 of 1977).
- (c) Child Justice Act, 2008 (Act No. 75 of 2008).
- (d) The Promotion of Administrative Justice, 2000 (Act No. 3 of 2000).
- (e) The National Health Act, 2003 (Act No. 61 of 2003).
- (f) The Mental Health Care Act, 2002 (Act No. 17 of 2002).
- (g) Prevention and Combatting of Torture of Persons Act, 2013 (Act No. 13 of 2013).
- (h) The Protection of Personal Information Act, 2013 (Act No. 4 of 2013).

(Other Acts that are referenced in the Correctional Services Act (Act No. 111 of 1998, as amended) are listed in Annexure A).

1.3 Policy mandates

The policy mandates of the Department are derived from the:

- (a) The White Paper on Corrections in South Africa (2005).
- (b) The White Paper on Remand Detention Management in South Africa (2014).

1.4 Legislative programme

The Correctional Services Act (Act No. 111 of 1998, as amended) will be reviewed, taking into consideration developments in the correctional system, the international and regional obligations, Nelson Mandela Rules and other judgments impacting on the interpretation of the Correctional Services Act (Act No. 111 of 1998, as amended). The Department has tabled an Amendment Bill to amend certain provisions of Sections 1, 73 and 136 of the Correctional Services Act, 1998 (Act No. 111 of 1998, as amended).

2. Updates to the Institutional Priorities, Policies and Strategies

2.1 Priorities in the development agenda

The Department has assessed the alignment of its plans with national planning instruments including the National Development Plan (NDP) and its five-year implementation plan, the MTSF, which articulates plans to give effect to National Government's seven strategic priorities. It is within the Correctional Services mandate that the role of Department finds expression in support of the MTSF Priorities, in particular Priority Six: Social cohesion and safe communities as well as Priority Two: Economic transformation and job creation and Priority Three: Education, skills and health.

There are no updates to the national government priorities as stated in the 2020-25 Revised Strategic Plan.

2.2 Institutional policies and strategies

The Department is responsible for ensuring effective policy coherence, policy coordination and policy implementation for correctional services. The iterative cycle of policy, planning, budgeting and implementation is prepared in consultation with the JCPS Cluster Departments where required.

The following policies and strategies have been identified for review in the 2021 MTEF period in addition to those stated in the 2020-25 Revised Strategic Plan:

- (a) The Sports, Recreation, Arts and Culture (SRAC) Policy to indicate the planned contribution to self-sufficiency; Formal Education and Skills Development policies and procedures to include e-learning and digitalisation.
- (b) Review of the Rehabilitation Policy to ensure that offender behaviour is corrected through access to social work services.
- (c) Review of the Child Offenders Policy to ensure that services rendered by the South African correctional system are accessible and equitable to respond to the needs of the child offenders.
- (d) Review of the Overcrowding Reduction Strategy to provide a comprehensive approach for the entire CJS to reduce the number of inmates in custody and promote the use of non-custodial measures.
- (e) Gender-Based Violence and Femicide (GBVF) Policy to provide strategic guidance on the implementation of programmes geared at addressing GBVF with focus on workplace related issues, inmates, probationers and parolees; and ensure advocacy against GBV.
- (f) Review of the Gang Combatting Strategy to maintain a secure and safe environment, protect vulnerable offenders, officials and service providers, develop the necessary protocols and agreements with other departments and agencies to ensure a comprehensive and coordinated approach in dealing with gangs as

well as to institutionalise programmes to deal with gangsterism.

2.3 Relevant court rulings

There are no updates to the court rulings as stated in the 2020-25 Revised Strategic Plan.

Part B Our Strategic Focus

Figure 1: Vision, Mission and Values

OUR VISION

Providing the best correctional services for a safer South Africa.

OUR MISSION

Contributing to a just, peaceful and safer South Africa through effective and humane incarceration of inmates and the rehabilitation and social reintegration of offenders.

OUR VALUES

The core values that underpin the culture of the Department are described below:

Development

We will endeavour to ensure that staff members are able to do the tasks they are appointed to do, that they internalise the values of correctional services, and that they always strive for excellence.

We will treat staff members as more than just workers and value them as people.

We will create workplaces that are inclusive of our skills and talents.

Integrity

We will be honest, show respect, and practise positive values.

We will act with integrity at all times and in all instances, ensuring that we remain corruption-free.

We will build sound business practices by creating policies and procedures that govern our activities.

Excellence

We will deliver on our outcomes and targets with quality work, within budget, and on time.

We will continuously seek new opportunities for service delivery improvement.

We will strive to achieve the best results in the service of all the people.

Accountability

We will remain committed to delivering all agreed outputs on time.

We will hold each other accountable in a spirit of mutual trust in honouring all our commitments.

We will take responsibility for and ownership of our outcomes and accept the consequence of failure to do so.

	Improved case management processes of inmates	 Review Case Management systems, processes and tools Review multi-pronged strategy and ensure integrated approach in the management of overcrowding with stakeholders 	 Functional Case Management structures Automated Case Management processes Willingness of offenders to participate in Case Management processes Dedicated Correctional Intervention Officers, Case Assessment Officials and Criminologists
	Increased access to needs-based rehabilitation programmes to improve moral fibre	 Increase access to education, training and skills development Improve moral fibre of inmates 	 All inmates are willing to participate in rehabilitation interventions and developmental programmes Strengthened collaborations amongst strategic partners Automated inmate management system
	Successful reintegration of all those under the care of the Department	 Increase accessibility of community corrections services in all district Advance victim-offender reconciliation Create economic opportunities for parolees and probationers 	 Offenders are accepted into the family and/or communities Offenders are economically independent after release
+>	Healthy incarcerated population	 Early detection and management of communicable diseases Early detection and management of non-communicable diseases Therapeutic diets available 	 Inmates in need of care must be willing to seek healthcare services Availability of primary healthcare resources
	High-performing ethical organisation	 Scalable and robust technology Strategic HR management Improved governance and compliance Accountable financial performance 	MTEF budget allocations in line with the service delivery requirements of the Department

6. Updated Situational Analysis

In 2020, COVID-19 affected almost all countries and more than 50 million people around the world. It has governments operating in a context of radical uncertainty, and faced with difficult trade-offs given the health, economic and social challenges it raises. The regional and local impact of the COVID-19 crisis is highly heterogeneous, with significant implications for crisis management and policy responses. South Africa has its own set of unique challenges. It was always going to be difficult to respond to the coronavirus pandemic given the high levels of poverty, inequality and unemployment in South Africa which makes a unified response far more difficult.

The inmate population represent a population with a significantly higher prevalence of physical morbidity and vulnerability to adverse outcomes. A closed community such as a correctional facility presents a unique infection control challenge for rapid spread of communicable diseases particularly in light of overcrowding which is common in both developed and developing countries. It is important that correctional facilities are not forgotten in the public health response to this crisis. Established principles such as social distancing, early identification of cases, safety of the most vulnerable and assertive treatment of those who become unwell will have similar benefits in corrections as in community settings. Officials, health-care professionals and service providers working in closed settings should be recognised as a crucial workforce for responding to the COVID-19 pandemic and receive appropriate support as necessary. Although the correctional environment is often considered distinct or isolated from the wider society and health system, the well-being of correctional officials and inmates is inexorably linked to the health of the country as a whole. The correctional officials and inmates constitute hundreds of thousands of family members and neighbours, and therefore, their safety is inherently a matter of public health.

A combination of strict sentencing guidelines, budget shortfalls and the punitive perception of corrections has made correctional services much more complex in the current environment. There are various measures adopted within correctional facilities, in line with the Correctional Services Act (Act No. 111 of 1998, as amended), to ensure the health and safety of the community, the correctional officials and inmates. Security within correctional facilities is intended to provide a stable, relative predictable environment in which an individual or group may pursue its ends without disruption and without fear of disturbance. The immediate operational objectives of security are to prevent escapes, maintain order and promote efficient functioning of the facilities. Overcrowded facilities weaken security and decrease oversight, which present different levels of security concerns. Balancing the necessary measures to ensure inmates, officials and citizens safety in times of growing pressure is critical to overcoming the current crisis.

Offender rehabilitation and reintegration have come to be embraced as a vital component of a comprehensive and holistic crime-fighting strategy. Rehabilitation programmes can not only reduce crime but also result in both direct and indirect fiscal benefits to the State. Direct fiscal benefits include reduced incarceration costs — as offenders will not return to correctional facilities — as well as reduced crime victim assistance costs. Indirect benefits could include reduced costs for public assistance, as offenders receive job training that leads to employment, thereby reducing the level of public assistance needed. If rehabilitation programmes are delivered effectively, these benefits can exceed the costs of providing the programmes and result in net fiscal benefits to the State. In addition to reducing recidivism, rehabilitation programmes also serve other related goals, such as making it easier to safely manage the inmate population, improving overall inmate wellbeing, and improving inmate skills and educational attainment. Increasing access to rehabilitation programmes would no doubt lead to better outcomes.

The environment within correctional facilities is markedly different from mainstream society. Upon release, offenders are plunged into an environment that is different from the correctional environment making it difficult to cope particularly where no support is available. Furthermore, given the dynamic and ever-changing nature of society, ex-offenders who spend long periods in correctional facilities are released into an environment that is different from their former environment. Unemployment has devastating consequences for many people and ex-offenders are no exception. It can result in stress, low self-esteem, depression and self-doubt. Thus, if the doors to employment are shut on offenders, the consequences for them and society are shattering. This poses a serious challenge for the reintegration of offenders. It is therefore critical that employment opportunities be given to ex-offenders to support their reintegration into society. Supporting ex-offenders prior to their release, after-care and follow-up services after incarceration is also critical to the reintegration process. Thus, institutions such as the courts, police, communities, religious and voluntary organisations and municipalities are seen as vital in supporting and facilitating the successful reintegration of offenders. Community corrections programmes will require increased focus on reintegration, involving the community (including law enforcement agencies) to help with supervision and accountability. There must be linkages between community corrections and community-based interventions to ensure continuity of support.

6.1 Updated External Environment

The deterioration in South Africa's economic growth, and stubbornly high unemployment were among the most influential determinants of the country's path to 2030. Along with Gross Domestic Product (GDP) growth slowing to below 2% per annum in the past four years, real GDP per person had also plateaued, with a stagnation in households' real disposable income and high debt levels. This had contributed to lower consumer spending, while corporate investment had also been declining due partly to policy uncertainty. Prior to COVID-19, conditions were expected to show only small improvement with growth forecasts remaining painfully low and confidence in the future was waning among both individuals and companies. Should the annual growth not move above 1% soon, South Africans will become poorer on a real GDP-perperson-basis, eroding the great strides taken in the previous two decades.

A large number of youth aged 25-34 years, remained unemployed, many for the long term. South Africa's labour absorption rate (or the proportion of the working-age population that is employed) has languished at around 40%, which is low when compared to the more normal 60% seen in similar economies. This reflected serious structural problems stemming from the myriad issues in the school system and labour market. There is no doubt that COVID-19 has created a new source of uncertainty in what was already a fractured state. Underlying issues have come to the fore, the consequences of which will play out over the next few years. COVID-19 remains the focus of attention as the country rolls back measures introduced to control its spread, in order to get the economy growing again.

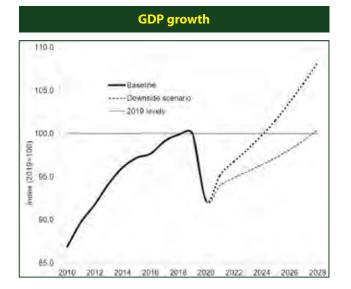

The State of National Disaster in South Africa provided a number of relief measures for many South Africans during the worst of the current crisis. The issue, however, is their ability to recover from these shocks when those measures come to an end. In a country that was already struggling with wealth and social disparities, despite the success of lockdown in managing the health crisis, South Africa emerges from it more worried, poorer and more unequal. There is little doubt that a better balance between health and economic imperatives must be found. This will require a different way of thinking about - and prioritising - these twin imperatives. The emphasis in managing the pandemic should now shift from a centrally regulated approach that controls activity to one that is enabling of participation and compliance in health solutions by communities, workers and businesses. Since behavioural change under difficult circumstances is required, this enabling approach is a necessary foundation for reducing risk in opening the economy.

The fundamental importance and urgency of improving the economy in order to preserve the country's high democratic standards and continue to uplift living conditions for South Africans cannot be overstated. The unification of the political parties behind a coherent policy is vital in the current conditions. It is likely that the damage done by the pandemic will necessitate significant economic reforms if South Africa is ever to fully recover. Controlling spending and fiscal discipline will be needed to control the debt-to-GDP trajectory. Equally important will be the recovery of supply chains and how quickly these get back to where they were before the crisis.

6.1.1 South African Economy

South Africa's GDP decreased by 51,0% in the second quarter of 2020 (April-June) owing to the impact of the COVID-19 lockdown restrictions since the end of March 2020, the fourth contraction in a row, according to the StatsSA GDP Quarter 2 Report. It was the steepest economic contraction since at least 1990, as the COVID-19 pandemic blow extended the recession into a fourth quarter, the longest period of consecutive quarterly contractions since 1992.

Figure 3: GDP growth forecast (2020 MTBPS)

The economy rebounded in the third quarter of 2020 (July–September), coinciding with the easing of COVID-19 lockdown restrictions. All industries recorded an increase in economic activity compared with the second quarter, with manufacturing, trade and mining leading the charge. Businesses were supported by an increase in both exports and household spending.

GDP grew by an estimated 13,5% in the third quarter, giving an annualised growth rate of 66,1%. This follows the significant slump of 16,6% (annualised: -51,7%) in the second quarter during the most restrictive months of the lockdown (April, May and June). The surge in economic activity in the third quarter may seem impressive, but it comes off the very low base recorded in the second quarter. South African industries still have a long way to go before reaching levels of production seen before the pandemic. Despite the rebound, the economy is still 5,8% smaller than it was at the end of 2019. Manufacturing, trade and mining were the biggest drivers of growth in the third quarter.

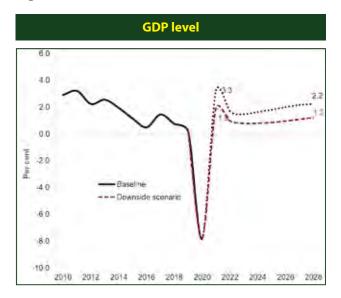

Figure 4: GDP Level (2020 MTBPS)

Government's medium-term policy priorities are economic recovery and fiscal consolidation. The social compact agreed to between Government, business, labour and civil society prioritises shortterm measures to support the economy, alongside crucial structural economic reforms. The economy contracted by 7.2% in 2020, with an expected recovery to real GDP growth of 3.3% in 2021. Economic growth is expected to average 1.9% in the outer two years. Fiscal measures, primarily reductions to the wage bill, will narrow the budget deficit and stabilise debt over the next five years to return the public finances to a sustainable position. The consolidated deficit narrows from 15.7% of GDP in 2020/21 to 7.3% by 2023/24. Gross national debt is projected to stabilise at 95.3% of GDP by 2025/26. If no reforms are enacted, GDP growth remains below 2% over the medium-term. At these growth rates, the level of GDP only reaches 2019 levels by 2028. This means that per capita GDP will not increase and unacceptably high unemployment levels will persist. The structure of the economy must be fundamentally altered by lowering barriers to entry, broadening ownership patterns, raising productivity and lowering the cost of doing business.

The COVID-19 outbreak has major health, social and economic impacts, presenting challenges in forecasting domestic economic activity. Containment

of COVID-19 is expected to support an improving growth outlook in 2021. However, getting back to prepandemic activity levels will take time. The overall risks to the inflation outlook appear to be to the downside. Global producer price and food inflation appears to have bottomed out. Oil prices remain low but have recovered somewhat. Local food price inflation is also expected to remain contained. Risks to inflation from currency depreciation are expected to stay muted while pass-through remains slow. However, electricity and other administered prices remain a concern. Upside risks to inflation could also emerge from heightened fiscal risks and sharp reductions in the supply of goods and services. Global economic and financial conditions are expected to remain volatile for the foreseeable future. In this highly uncertain environment, future decisions will continue to be data dependent and sensitive to the balance of risks to the outlook.

6.1.2 Crime statistics in South Africa

There was an overall reduction in reported crime for the 2019/20 financial year, however, violent crime in South Africa, including murders continue to increase, according to the South African Police Service (SAPS) crime statistics.

Category	2019	2020	Change
Contact crimes	617 210	621 282	+0.7%
Contact-related crimes	117 172	112 244	-4.2%
Property-related crimes	495 161	469 224	-5.2%
Other serious crimes	444 447	426 589	-4.0%
Total public reported	1 673 990	1 629 319	-2.7%
Crime detected as a result of police action	339 281	290 176	-14.5%
Total	2 013 271	1 919 495	-4.7%

Table 1: South Africa's crime statistics for the period 01 April 2019 to 31 March 2020

During the 2019/20 period, 21 325 murders were recorded, 303 murders more than the previous year, an increase of 1,4%. On average, 58 people were murdered every day. A total of 2 695 women and 943 children were murdered in South Africa. Robbery with aggravating circumstances increased by 2,8%

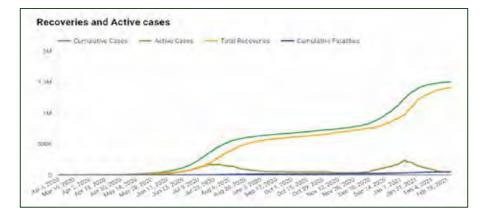

to 143 990 cases, while the 51 825 cases of common robbery were only 60 more cases than the previous year. Carjacking and truck hijacking recorded an increase of 13,3% and 1,7% respectively. Sexual offences also showed an increase of 1,7% to 53 293 cases, 873 more than the previous year. The rate of sexual offences decreased slightly from 90.9 per 100,000 in 2018/19 to 90.8 in 2019/20. Community reported crime decreased by 2,7%, stock theft by 4,2% and property related crimes, including burglary at residential premises declined by 6,7%. Robbery at residential properties also recorded a decrease of 5,8%.

6.1.3 The COVID-19 pandemic in South Africa

At least 40 countries have now seen a second wave of the COVID-19 pandemic. The massive resurgence in SARSCoV-2, the Coronavirus, has produced variants suspected of such great transmissibility and is exacerbated by inadequate adherence to nonpharmaceutical interventions to contain the spread. Although South Africa has seen a decrease in new COVID-19 cases after a severe second wave, scientists caution that a third and even fourth wave is looming. More alarmingly, the increased spread of the virus is generating a corresponding acceleration in the numbers of people infected and, by extension, is exposing health systems in even the best resourced countries to an overwhelming burden with which they are increasingly unable to cope. South Africa cannot afford to repeat the hard lockdown imposed in March 2020, which caused massive economic and social damage.

Humanity is now facing the full force of the greatest public health emergency in modern history, with no sign that the force of the pandemic will abate anytime soon. The only instrument humanity now has to contain the pandemic, is that effective vaccines are becoming available through an uneven and desperate race among nations. Even this hopeful intervention will not bring solace anytime soon. South Africa requires innovative solutions and policies to ensure that when the country emerges from this social and economic crisis, it does so not only aware of the country's weaknesses but also primed to effect the necessary changes.

Figure 5: COVID-19 positive cases and recoveries in South Africa

Source: https://www.covid19sa.org/ (Wits University and iThemba LABS)

There are particular risks which COVID-19 has on confined populations as physical distancing is limited due to overcrowding which compromises the implementation of adequate Infection Prevention and Control (IPC) measures and the infrastructural design which does not allow for proper ventilation. It is worth noting that most correctional officials reside in the community outside of correctional facilities and at the same time interact closely with the inmates on a daily basis to render the much needed services. This inherently increases the risk of infection.

The Department receives inmates through the CJS for safe custody and is therefore obliged to meet all the identified health care needs through the implementation of relevant health strategies and policies as well as the approved SOPs and ensures referral and linkage to the required level of care. The SOPs are utilised together with other SOPs and Guidelines from the DoH, NICD, Centre for Disease Control (CDC) and the World Health Organisation (WHO) to provide guidance on mitigation strategies that must be implemented to prevent, detect and respond to COVID-19 in the Department. The SOPs are reviewed as required to incorporate new developments on the COVID-19 pandemic.

The COVID-19 Strategy of the Department considers the rate of COVID-19 infections, deaths, recoveries and measures required in terms of the national state of disaster. The Department recorded 6 850 COVID-19 cases among officials and 3 776 among inmates as at 31 January 2021. This accounted for 0.47 % and 0.26 % respectively of the national COVID-19 cases (1 453 761) as reported by the Department of Health. The high number of inmates affected in the Eastern Cape indicates the impact of the pandemic in the Region i.e. where the first infection started in the Department. Mass outbreaks within correctional facilities have been avoided through strict observance of preventative and protection measures supported by regular screening and testing as per prescribed guidelines. All necessary preventative measures have been taken to ensure health and safety within correctional facilities, while prioritising and protecting inmates and officials. Containment and symptomatic treatment protocols are activated for confirmed COVID-19 cases, (those who test positive for COVID-19 are isolated and close contacts quarantined), to manage the spread of the pandemic. Healthcare teams are rendering care services to inmates and monitoring those likely to develop related COVID-19 symptoms. Working together with the DoH, NICD and WHO ensures that the Department is kept abreast with the latest developments in COVID-19 management. The Department as a Primary Health Care (PHC) institution managed mild COVID-19 cases and refer moderate and severe cases to the DoH for secondary and tertiary levels of care.

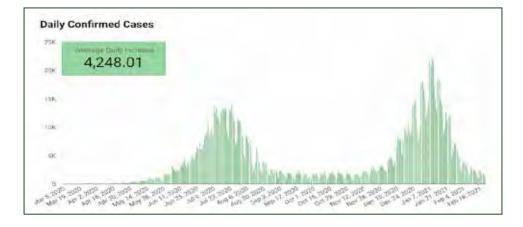

Figure 6: COVID-19 daily positive cases in South Africa

Source: <u>https://www.covid19sa.org/</u> (Wits University and iThemba LABS)

Figure 6 illustrates the exponential increase of infections in South Africa with more than 20 000 new cases reported from 06 to 09 January 2021, setting a new record for the number of infections in a day. As South Africa neared toward the end of its second COVID-19 wave in the latter part of February 2021, the rate of new infections was firmly on a downward slope. The second wave of COVID-19 infections may well be followed by further waves, which will threaten

both the health of South Africans and the recovery of the economy. South Africa is a member of the COVID-19 Vaccines Global Access (COVAX) vaccine programme; a global initiative aimed at working with vaccine manufacturers to provide countries worldwide with equitable access to safe and effective vaccines. Government is procuring vaccines through three channels, i.e. through the WHO's COVAX facility, through the African Union's vaccine initiative and through direct engagements with vaccine manufacturers. The roll out of the COVID-19 vaccine, which commenced on 17 February 2021 in South Africa, will take place in three phases and will play a critical role in controlling the pandemic. Government plans to vaccinate a minimum of 67% of the population (about 40-million people) to achieve population immunity, when most of the population is expected to be resistant to an infectious disease, by the end of the year. The Department has begun to align its strategies with the direction provided by national Government led by the DoH and developed a COVID-19 Vaccination Roll-out Plan for officials and inmates.

There are three priorities that require most of the country's attention to ensure that the return to work is sustained and employment protected. The first priority is to implement "risk-adjusted strategies" that act like dynamic early warning systems and virus containment measures. They are within the country's immediate capability to implement, set up to be flexible and adaptable to learning and feedback. The second priority is to engage far more deeply with stakeholders to identify strategies that can be sustained in a variety of living conditions. It is impossible to sustain significant behavioural change in the adherence to difficult health protocols without the support of stakeholders in respect of design and implementation. Adherence to measures that push up information and behaviour that is compliant with physical distancing, mask-wearing and disinfection requires that people understand why they are important and that the measures are designed to be sustainably and realistically implemented.

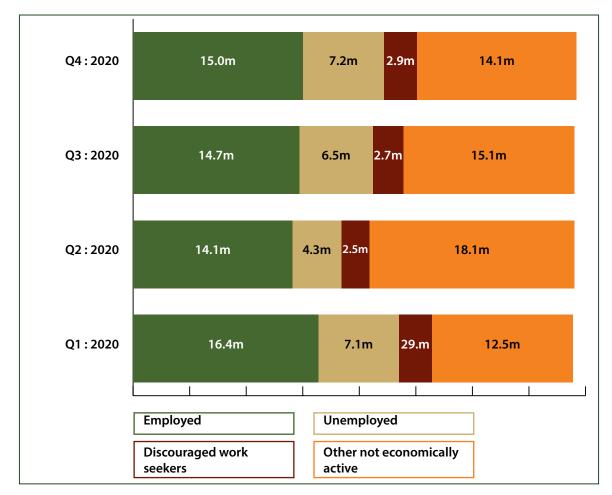

The third priority is to sustain economic activity and ensure economic capacity is not unnecessarily lost. It is always better to generate revenue than it is to borrow for the shortfall. Success in opening up will depend on the effective implementation of health and safety protocols and successful roll out of the COVID-19 vaccine. Compliance monitoring will have to be significantly ramped up. The economic rebound will be stronger, the fuller and faster business support is delivered to slow down retrenchment and closures. Informal traders should be supported with their supply chains and get them online, according to health guidelines and those losing income due to the pandemic should be actively channelled back into work opportunities.

6.1.4 Unemployment

The results of the Quarterly Labour Force Survey (QLFS) for the fourth quarter of 2020 show that the number of employed persons increased by 333 000 to 15,0 million in the fourth quarter of 2020, and the number of unemployed persons also increased by 701 000 to 7,2 million compared to the third quarter of 2020, resulting in an increase of 1,0 million (up by 4,9%) in the number of people in the labour force. More than half (52.3%) of the 7.2 million unemployed persons had education levels below matric. By comparison, only 1.8% of the unemployed were graduates and 7.5% had other tertiary qualifications.

The movement was proportionately more towards the unemployed than for the employed, which resulted in a significant increase of 1.7% in the official unemployment rate to 32,5%. Most job losses were observed in Finance (256 000), Community and social services (241 000) and Manufacturing (230 000). The unemployment rate among the black African (36.5%) population group remains higher than the national average and other population groups. Black women are the most vulnerable with an unemployment rate of 38.5%. Unemployment was mostly concentrated among youth, those aged between 15 and 24 years with a rate of 63.2% and with those aged between 25 and 35, with a rate of 41.2%. Dealing with the country's severe unemployment situation, particularly within the youth category remains a key priority of Government and this was reiterated in the 2021 SONA.

An analysis of the unemployment rate suggest that only 42% of adult South Africans work (compared to 61% for middle-income countries, on average), between 2008 and 2019, the number of people who are unable to find employment rose from 6.5 million to 10.3 million and approximately 1 700 South Africans join the labour market every day however fewer than 500 of them find employment. South Africa's unemployment rate increased by 7.5% to 30.8% in the third quarter of 2020 compared to the second quarter. In the second quarter, the official unemployment rate decreased from 30.1% in the first quarter of 2020 to a record low of 23.3%. However, the country was under a hard lockdown in the second quarter of the year, with prospective job seekers unable to look for work. COVID-19 has had a devastating effect on the economy, leading to many businesses having to close down permanently or decrease their workforce. The increase in the unemployment rate was expected considering that the economy has been recovering since the lockdown meltdown in the second quarter, when it contracted 51% on a seasonally adjusted and annualised basis. Many people who were unable to work then have been able to return to work while others were not able to return to work if their employers were not able to re-employ them. Unemployment challenges cannot be addressed in the traditional way and an entirely new approach is needed to resolve this issue.

Given that employment is the main bridge between economic growth and higher living standards, a positive employment environment is the key requirement for sustainable social transformation in South Africa. Reductions in unemployment will depend critically on growth induced increases in labour demand and on the supply of a well educated labour force with the necessary skills to fill the jobs that are created. Given that the South African economy has moved into sectors such as financial services and other service sectors, the shift is increasingly towards a higher demand for skilled workers. Skillbiased technical change is a global phenomenon and is unlikely to be reversed. Facilitating the growth of entrepreneurship remains an important alternate employment strategy.

6.1.5 JCPS Cluster Priorities

Given the current and projected trends of COVID-19 in South Africa, the strategic focus of the JCPS Cluster is to prevent and combat crime and render support during the containment and management of the COVID-19 pandemic through the implementation of a District Development Model approach; to ensure safety and security across the country; and in particular, in the identified and potential hotspot areas. The JCPS strategy, which is grounded in the key recommendations of the country's Economic Transformation and Inclusive Growth Strategy, identifies and expands on economic measures which the JCPS Cluster can implement in order to mitigate the effects of the weak economic outlook.

It is premised on the principle that there should be more emphasis on the prevention of corruption through good governance, transparency, integrity management and accountability in society, and early detection of potential corrupt practices to supplement the reactive measures executed by law enforcement agencies and other anti-corruption bodies in society. The JCPS Cluster will focus on law enforcement, monitoring and providing advice on factors related to ensuring the territorial integrity of the State, economic growth, safety of South Africans and to further ensure that sovereignty of the State is maintained. The Cluster also has a crucial role to play in the vaccine rollout plan, i.e. to ensure security of the vaccine from landing, storage and distribution.

6.2 Performance Environment

The health and safety of officials, inmates and stakeholders emphasises that human resources are central to the functioning of the Department. The imposed changes brought on by the spread of COVID-19 have been met with difficult decisions to manage resources within a constrained budget and ensure the sustainability of services delivered by the Department. Predicting what the country will look like is not easy, however it can be reasonably assumed that the situation will not simply revert to the way it was before the pandemic. Anticipating the changes that lie ahead will be difficult as recent history does not provide any points of reference to learn from. The country has simply never faced a crisis like this before. Although it may not be possible to predict the COVID-19 landscape, it is still necessary to plan for it.

The Department is classified as essential services and these services must be provided in accordance with statutory mandates set out in the Constitution of the Republic of South Africa (Act No. 108 of 1996, as amended), the Correctional Services Act (Act No. 111 of 1998, as amended) and the Criminal Procedure Act (Act No. 51 of 1977), among others. It is, however, acknowledged that the COVID-19 pandemic and the accompanying declaration of the National State of Disaster, necessitates the Department to limit its functions in line with the risk-adjusted levels pronounced by the National Coronavirus Command Council. The risk-adjusted strategy outlines activities that can take place at various COVID-19 Alert Levels. To avoid a return to a stringent lockdown, it is imperative that every person within the correctional environment, adheres to the prevention and control practices provided, and implements the necessary health and safety measures to avoid further negative effects on the service delivery.

COVID-19 measures in correctional facilities have in effect delayed the release of offenders by limiting participation in rehabilitation activities required to progress their sentences. Inside the correctional facilities, the movement of inmates during the COVID-19 outbreak is structured and guided by the DCS Risk Adjusted Strategy. Modified rehabilitation programmes are implemented in an effort to limit movement of both officials and the inmate population throughout the facility. This includes staggered recreation schedules to allow for physical distancing and disinfecting between use while not mixing education and rehabilitation materials and only essential transfers which dictates mandatory testing and quarantine timeframes for all transfers. In line with regulations to combat the spread of COVID-19, the Department suspended visits to all correctional centres and remand detention facilities. This was to circumvent a mass infection in the inmate population which can have catastrophic consequences for the public healthcare system, especially if inmates suffer serious symptoms and require intensive care. External volunteers and other professionals are often responsible for delivering rehabilitation programmes offered to offenders. With rehabilitation programmes suspended, offenders were faced with more unstructured and idle time. Providing alternative activities like increased participation in Art programme through Mural Art Project, recreational or library time was also a challenge during the lockdown period. Limited participation in rehabilitation activities could lead to offenders spending longer periods in correctional facilities than they might have otherwise. This is because they may be unable to demonstrate to the Parole Boards that they have taken part in rehabilitation activities to correct offending behaviour.

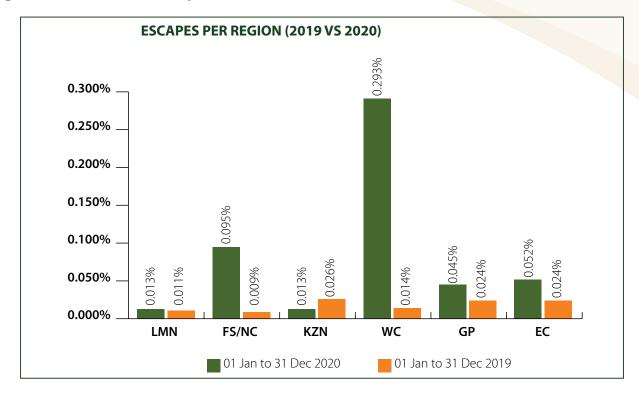

Despite the challenges experienced, the Department has been able to adapt by reallocating resources, while concurrently implementing alternative modes of delivery. The agility of the Department in making decisions and adapting to changes in regulations, policy and stakeholder interface is more imperative than ever. Alignment of the APP to the new norms is necessary to ensure that operational decisions are not only swift but also guided by outcomes. Optimising expenditure is necessary to enable efficient agile and robust systems of operations, through the removal of redundant resources. Reassessing non-optimal facilities, non-essential processes and formalities, as well as resource-consuming manual processes that would be more effectively completed through digitisation and automation, will allow increased working capital, enable workforce flexibility, increase productivity and ultimately realise new opportunities.

Digital transformation has opened borders that COVID-19 has closed, and the manner and efficiency in which systems have been implemented highlights the potential embracing technology has on transforming the way work is executed. The Department has developed an MISSTP and initiated digital transformation strategies which have been augmented due to the COVID-19 pandemic. Accelerating these efforts, together with aligning them to outcomes, will not only improve management and effectiveness during the crisis but also to handle the shifting demand towards digital systems for the coming years.

Security

The Department recorded an average of 51 escapes per financial year from 2012/13 to 2019/20, however there was an increase in the number of recorded escapes during 2020. The Western Cape (WC) Region recorded the highest number of escapes (73), during 2020, followed by the Free State/Northern Cape (FS/ NC) with 18 escapes and the Gauteng (GP) Region with 15 escapes. The Gauteng Region has the highest inmate population followed by the Western Cape and KwaZulu-Natal (KZN) Regions. Escapes from correctional facilities can largely be attributed to overcrowding, dilapidated infrastructure and noncompliance with security policies. In addition to the stated challenges, the unintended consequences of the lockdown regulations resulted in idleness among inmates due to the restricted movement of inmates in terms of court appearances, cancellation of visitations, limited work teams performing essential functions, etc.

Figure 8: Total number of escapes for 2019 and 2020

The Department has recorded a 0.77% increase in the number of assaults over the 12-month period, an acute indicator of distress. The GP Region recorded the highest number of assaults for the period 01 January to 31 December 2020, i.e. 1 720 assaults, followed by the WC and FS/NC Regions with 1 145 and 970 reported assaults. The reported assaults can be attributed to the COVID-19 lockdown, among other factors, that increased the levels of anxiety, frustration and violence among inmates. During this period, the searching of vehicles, public, service providers and inmates in the correctional facilities was not fully effective. Searching is one the key functions in a correctional facility environment which ensures the removal of contrabands that could lead to assaults. The Department will continue to provide speedy responses to security incidents with the involvement and supervision by senior officials to create security awareness, monitoring and evaluation, special operations, deployment of Emergency Support Teams (ESTs) to hotspot areas, implementation of the Assault Prevention Plan and, most importantly, awareness campaigns to educate inmates and expand their knowledge of COVID-19 to create stability within correctional facilities.

As part of the strategy to reduce security incidences the Department will ensure the effective management and feedback of complaints to inmates as well as increasing vigilance during inmate escorts. Essential activities included in the Correctional Sentence Plans (CSPs) plans, i.e. agricultural, bakeries and production workshops, education, art work must continue with increased supervision. The implementation of the Security Stabilisation Plans, SOPs and the continuous Threat and Risk Assessment (TRA) at identified correctional facilities remains a priority for the Department.

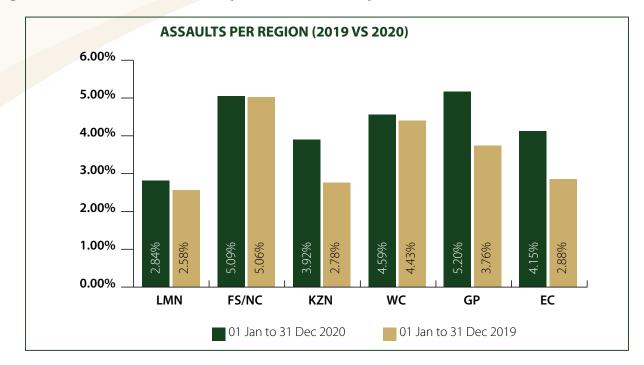

Figure 9: Total number of inmates injured as a result of reported assaults

The measures put in place to ensure the health and safety of officials and inmates, such as availability of Personal Protective Equipment, screening and testing, identification of quarantine and isolation sites for positive cases has created stability with correctional facilities affirming the Department's commitment to containing the spread of the virus. Furthermore, a National Security Committee was established (inclusive of Head Office, Regions and Management Areas) to deal with, among others, emergency security issues.

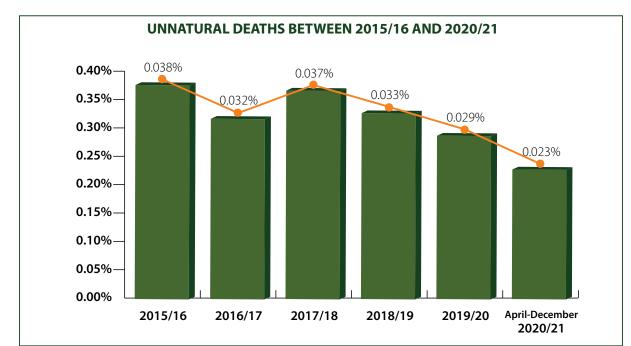

Figure 10: Total number of unnatural deaths from 2015 to December 2020/21

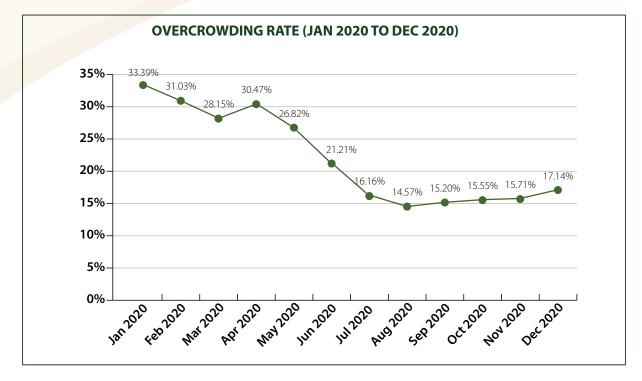

Over the years there has been a decline in unnatural deaths (homicides) of inmates. The unnatural deaths recorded as 0,023% as at 31 December 2020 decreased by 0.014% from 2017/18 performance of 0.037%. The Department continues to put measures in place to ensure a further decrease in unnatural deaths. Research and work-studies will be conducted for the procurement into suitable working attire where officials are confident and will perform their duties optimally (especially those dealing directly with the public and inmates) amid the COVID-19 pandemic.

The EST special operations (clean-up and adhoc search operations), particularly in hotspot areas will be intensified across all Regions and monitored on a regularly basis. TRAs have been conducted at various correctional facilities; the findings of which will be analysed to pro-actively deal with and contain security threats. The training manual on gang management will increase awareness on gang related activities and assist to develop effective responses in the management of gangs. The efficiency and effectiveness of security services will be improved through the implementation of the Service Delivery Model. This will address the alignment of security dependencies with other functions within the value chain.

Incarceration

Punitive criminal justice policies have had an impact on the growth of the inmate population and overcrowding in many countries, and South Africa is no different. Overcrowding undermines all efforts of the correctional systems through stretching resources, hampering efforts of rehabilitation and ultimately contribute to escapes, injuries and unnatural deaths within correctional facilities. This can be unsafe for both inmates and correctional officials. The down management of the inmate population must be managed against external factors, such as crime tendencies in society, increasingly effective measures to combat and prosecute crime, slow economic growth, the high unemployment rate, and mandatory minimum sentences. Minimum sentencing legislation compels the courts to comply with the minimum sentences ranging from 15 years to life for certain serious offences. The overcrowding status varies over time and across correctional facilities. As the conviction rate increases the number of offenders incarcerated against the number of offenders released increases, compromising the safety and wellbeing of offenders. Infectious diseases like COVID-19 can spread rapidly in overcrowded and closed settings like correctional facilities, especially if there is limited access to health care, water, sanitation and hygiene. The Department will continue to advocate for the effective use of sentence conversion and the use of non-custodial sentences to reduce the overcrowding levels.

During the financial year 2019/2020 the Department implemented the 2019/20 Special Remission of Sentences, which resulted in an 8% overall decrease in the overcrowding level down 28% at the end of the financial year. In an effort to curb the spread of the COVID-19 infection in overcrowded correctional facilities, the Department further implemented the 2020/21 Special Parole Dispensation. The Special Parole Dispensation which commenced on 20 May 2020 resulted in a further decrease in the overcrowding level by 11%. The Department was able to effect an overall decrease of 16.13% in the overcrowding level within a 12-month period through both the Special Remission and Special Parole Dispensation to release offenders who had reached their Minimum Detention Periods within a period of 60 months and those sentenced for non-violent crimes. This resulted in the lowest overcrowding level recorded for the past 10 years at 17%.

The Special Parole Dispensation allowed the low risk offenders to be considered for parole by the parole boards by individually evaluating each case to determine the level of risk prior placement. During this period the Parole Boards adopted alternative means of representations so that the participation of victims and SAPS could be made in writing during parole meetings as physical attendance was suspended for some time. Notwithstanding the use of alternative service delivery methods, the Parole Boards still ensured that qualifying offenders benefitted from the Special Parole Dispensation.

Best practices to reduce overcrowding call for concerted and comprehensive efforts on the part of the entire CJS, involving the cooperation and coordination of all criminal justice stakeholders. Integrated planning and information systems must be prioritised to address the management of overcrowding. The need for a complete, accurate and accessible criminal justice system is a prerequisite for effective policymaking and management within corrections. Specific strategies required in the management of overcrowding include: (a) to ensure a system-wide, integrated and sustained approach to the criminal justice process and related programmes; (b) to improve the efficiency of the criminal justice process; (c) to ensure comprehensive sentencing legislation; (d) to increase the use of alternatives to detention and incarceration on the basis of the principle of incarceration as a last resort and the principle of proportionality; (e) to strengthen access to justice and public defence mechanisms; (f) to develop or strengthen, as appropriate, provisions for early release; (g) to strengthen measures to prevent recidivism, such as rehabilitation and reintegration programmes; (h) to increase bedspace capacity if absolutely necessary; and (i) to conduct research and development activities relating to information systems for the justice and corrections sectors.

Currently, all case management business processes are manually conducted which results in inaccuracies and lack of real time data. Automation will contribute to faster service delivery, less human resource, more efficient monitoring, auditing and research. Automation of business processes will ease the implementation of alternative service delivery modes, accurate projection of required human resource to drive rehabilitation, custodial and security services as well as improve Case Management Committees and parole processes. The shift pattern needs to accommodate immediate risk and needs assessments as per admission times. The utilisation of interim structures such as that of Case Assessment Officers and Case Intervention Officers and deployment of personnel to more than one function is utilised as an interim measure to conduct assessments and facilitate correctional programmes however the quality of correctional sentence plans must be enhanced.

Remand Detention

The South African CJS has a number of role players that are involved in the management of Remand Detainees from the time of arrest to sentencing. The Department is responsible for the safe custody and well-being of Remand Detainees as a stakeholder in the CJS at both the front and back end. The front end entails the detention of remand detainees during pre-trial and trial phases as well as the monitoring of the accused placed under section 62(f) of the Criminal Procedure Act (Act No. 51 of 1977) read together Correctional Service Act (Act No. 111 of 1998, as amended), Chapter V Management, Safe Custody and Well-Being of Remand Detainees (ss46-49G) and Correctional Services Regulations Chapter IV Management, Safe Custody and Well-being of Remand Detainees (regulations 26-26l). The back end

entails the carrying out of court sentences through the detention of sentenced offenders and managing those placed under the probation and parole system.

The Remand Detainee population is influenced by the duration in pre-trial, the duration of the sanctions imposed, the non-custodial measures applied including the parole system or early release schemes such as conditional release, probation periods and partial or total alternatives to incarceration. The Department is committed to creating a secure and humane environment for Remand Detainees that allows for the minimal limitation of an individual's rights, while ensuring that remand detention processes are effectively managed and Remand Detainees attend court in accordance with relevant legislation.

The Remand Detainees detained for longer than a period of two years have gradually grown partly due to the COVID-19 pandemic which resulted in the closure of courts during the complete lockdown in April 2020. During the period 26 March to 05 May 2020 the remand detention population increased by 19.52%. The gradual reopening of the courts at different alert levels was also interrupted by closures that had to take place due to decontamination, quarantine and isolation of certain personnel who render court services. Since the easing of lockdown there has been a steady reduction of the remand detention population. The backlog project led by the DoJ&CD includes the allocation of court dates to remand detainees. Further to this, there was a proliferation in the use of AVR court during the lockdown and bail payments were done in courts to contain of the spread of COVID-19 in correctional facilities.

Referral of certain categories of Remand Detainees to court for bail review in line with Section 63A and Section 63 (1) of the Criminal Procedure Act (Act No. 51, 1977) takes place on a monthly basis, however, many of the referrals return as unsuccessful. A total of 3 541 referrals were submitted for bail review as at 31 December 2020 of which only 896 (25.30%) were successful. In addition, a total of 2 217 applications were submitted to court for consideration of the length of detention before completing the full period in line with section 49G of the Correctional Services Act (Act No. 111 of 1998, as amended) and only 789 (35.5%) applications were successful.

The average number of Remand Detainees recorded for 31 December 2020 was 46656, while the number of remand detainees with bail constitute approximately 10% of the remand detainee population. Even the lower bail amounts are more than most people can afford to pay, and many spend time in remand detention facilities for lack of as little as R500. But the unpaid bail amount pales in comparison with the vast amount of money the Department will spend on accommodation, food and healthcare of Remand Detainees. As inmates await court hearings in remand detention facilities, sometimes for months or even years they many lose their employment and housing which imposes a burden on people and their families, especially low-income households.

Through consultations with relevant role players within the CJS such as the SAPS, National Prosecuting Authority (NPA), DoJ&CD and Legal Aid South Africa, interventions aimed at reducing the remand detention population are implemented and monitored during the levels of lockdown and beyond. The successful implementation of the down management strategies is dependent on collaboration between all stakeholders within the CJS. The Department is actively participating in the legislative review of the Criminal Procedure Act (Act No.51 of 1977), and has put forward proposals that will assist in improving the management of overcrowding in correctional facilities through encouraging the use on non-custodial placement for certain categories of sentenced offenders.

Rehabilitation

The provision of needs-based rehabilitation programmes is one of the key strategic focus areas for the 2021/22 financial year. The Department plays a vital role in rehabilitating offenders and reducing the likelihood of reoffending by conducting proper assessments and structuring appropriate programmes and interventions available within correctional facilities. These include correctional and skills development programmes, education and psychological, social and spiritual care services. The delivery of correctional services is labour intensive hence the role of correctional officials as rehabilitators cannot be underestimated. The Department's focus is to ensure that sufficient capacity exists to handle complex offender rehabilitation and development issues. Through the improved marketing of needsbased programmes, the appointment of personnel and involvement of external service providers' performance is expected to improve over the MTEF period. Improved access to rehabilitation and developmental interventions by offenders, in line with the mandate of the Department, should contribute towards the successful reintegration of inmates into society.

In order to provide quality education there must be an adaptation to the digital era and a shift over to the multi-modal and remote learning. It is important to equip schools with smart TVs for access to digital platforms and assist educators with computers/ laptops to access support material. Internet connectivity is a necessary requirement to access education whether it is at basic education level or at tertiary level. The Department will consider resources beyond the infrastructure to re-adjust the mode of learning to also include smart classrooms to ensure increased access to education for offenders.

The Department contributes to the improvement of offender training allocated to workplaces and provides learning pathways that can support successful reintegration. Increasing access to vocational education (TVET college programmes) and occupational skills training for offenders will continue to prioritised over the MTEF. This includes measures to support successful participation and attainment across a range of fields of study and levels of vocational education and training. Transfers of offenders to different correctional centres as well as the early release of offenders adversely effect the skills training offered to offenders as some of the offenders do not complete the required training. Information of accredited training provided to offenders is uploaded on the National Learners' Records Database as required by the South African Qualifications Authority. This enables that qualifications and part qualifications (including unit standards) registered on the National Qualifications Framework (NQF), to be accessed and completed at an institution of choice upon release.

The Department will focus on the implementation of self-sufficiency strategy over the MTEF for both agriculture and production workshops' operations. Agriculture was one of the sectors that were declared as critical and exempted from the stringent COVID-19 lockdown regulations. Agriculture is expected to display some resilience, from the perspective of jobs, as an increase in production performance, would require more labour to meet the demand. In South Africa, agriculture grew by 15.1%, and contributed 0.3% points to the country's GDP in second quarter of 2020, which was attributed to an increase in the production performance of field crops (StatsSA). On the other hand, manufacturing declined by 74,9%, due work stoppages and lower demand for steel. A similar trend was observed in correctional facilities during this period as the production workshops have not been fully functional except for essential services such as the production of cloth face masks.

The manufacturing of cloth face masks will continue to be prioritised as an important intervention to assist in reducing the spread of COVID-19. The expansion of agriculture production will also be prioritised, to stimulate the enhancement of self-sufficiency on food security. The re-establishment of orchards, planted pastures (for animal fodder), optimising vegetable and chicken meat production, replacement of old/unproductive breeding animals, as well as replacement of old machinery and equipment in agriculture and production workshops will be prioritised over the MTEF. The Department will also focus on the expansion of bakeries to ensure growth in bread production, cost savings, and enhance offender skills utilisation as well as development. The operations of production workshops, including textile and shoe factory will receive attention in order to improve on manufacturing output and contribute towards self-sufficiency.

International research has demonstrated that offering targeted and effective rehabilitation services to offenders is an effective way to decrease an offender's likelihood of reoffending. A reduction in reoffending will mean fewer victims of crime and a decreased social and economic cost to the community. Correction requires a multi-dimensional approach to treating offending behaviours in a secure, safe and humane environment. In order to provide increased rehabilitation programmes for offenders over the medium term, the Department aims to improve its marketing of rehabilitation services to other Government departments and Non-Governmental Organisations (NGOs), and to strengthen formal partnerships with the community. The White Paper on Corrections encourages engagement with the community in the rehabilitation process because this is a societal responsibility. The White Paper also pronounces that Rehabilitation is achieved through holistic sentence planning - addressing all human needs of offenders (in a secure environment). Sentence planning will, therefore, be enhanced to be reiterative to the changing circumstances of the offender, i.e. must be proactive, real time and reactive. The development of individualised needs-based programmes targeting the offending behaviour aims to raise awareness, provide information and assist the offender to develop and improve their life skills.

The aim of needs-based rehabilitation is to influence the offender to adopt a positive and appropriate system of norms and values, alternative social interaction options and to develop life, social and employment skills that will equip him/her holistically and reduce the tendency to return to crime. Improving the level of care and protection of offenders, particularly the special categories of offenders, will require relevant training to implement the various pieces of legislation that affect the care of offenders.

Social Reintegration

The JCPS Cluster contributes directly to creating safe communities, social cohesion and maintaining the rule of law, thereby ensuring that South Africans are and feel safe. In ensuring that, the CJS together with SAPS, DOJ&CD and NPA, Department of Social

Development (DSD) and the DBE embarked on a process to develop an integrated court manual for court proceedings. Officials will be trained on court proceedings which will assist in the placement of qualifying cases under the system of correctional supervision and eliminate overcrowding and cost to a State facilities.

The COVID-19 reality has affected processes within community corrections that are required to be followed before the release of offenders into community corrections. The situation also reduced the practice of physical monitoring of compliance on all supervision categories to remote monitoring with physical monitoring limited to high risk offenders. The unemployment rate, which is widely recognised as a key indicator of the performance of a country's labour market, is a measure of the hardship for South African families. This has a direct impact on the employability of parolees and probationers and contributes to reoffending and violation of parole conditions.

The initiative of parolees and probationer participation in community projects seeks to ensure that they contribute to the communities that have been offended. The facilitation of economic opportunities for parolees and probationers by the Department is aimed at assisting them in securing employment, which they struggle to secure due to their criminal record status. The COVID-19 pandemic has brought enormous strain and will continue to do so because parolees and probationers are at a disadvantage in securing jobs as compared to graduates and those outside the correctional facilities. This amplifies the need to service the existing relationships between the Department and business sector, in particular prospective employers.

The Restorative Justice processes and VOD intervention programmes have been affected by the lockdown and COVID-19 regulations, particularly as it relates to the need for social distancing during engagements. Although the COVID 19 regulations have hindered the actual participation of both victims and offenders, parolees and probationers, the programmes are gradually gaining momentum and the demand for participation is increasing from all parties concerned. The current and previous performance on the victim participation in particular, has been enhanced by the work performed by the contracted Social Auxiliary Workers.

The 2019 Special Remission of sentence has reduced the population in community corrections from 71 524 to 55 000, however, the 2020 Special Parole Dispensation has subsequently increased the community corrections caseload once again. The caseload has increased to 61 526 noting also that there were further releases and parole revocations of the same category during this period.

Community Corrections needs to expand its role over the MTEF in order to render holistic comprehensive services to the offender in line with the Social Reintegration Framework. This will promote the use of community-based sentences as opposed to incarceration and will improve the lives of those who are placed on probation or parole. Community Corrections will refocus on facilitating behavioural change and supporting offenders' efforts to improve their quality of life through structured programmes, as opposed to monitoring compliance with supervision requirements. This must include special categories of offenders in all needs based services and interventions through linkage with available resources within the community. Integration with district and regional models will be prioritised to ensure accessibility of services in line with the identified needs of the offender.

Given the diversity of Community Corrections, the system should be driven by evidence-based practices as it evolves, including the use of self-validating risk/ needs assessment instruments that are designed specifically for the social dynamics of particular geographical areas (e.g., culture, employment rate, values). Concerted efforts will be made to engage Government departments, NGOs, faith-based organisations and community-based organisations, communities and society at large where offenders reside as partners in the reintegration process to accept that changing criminal behaviour is a shared responsibility and explain the role that these stakeholders have to play.

Care

Health care delivery in the Department contributes to the universal Sustainable Development Goals (SDGs) and those particularly relevant for the delivery of health care are Goal: 2 (End hunger, achieve food security and improved nutrition, Goal 3 (Good health and wellbeing - ensure healthy lives and promote wellbeing for all at all ages), and Goal 6 (ensure availability and sustainable management of water and sanitation for all). The National Development Plan (NDP) 2030 envisions a health system that works for everyone and produces positive health outcomes, is accessible to all and strengthens the overall health system by increasing life expectancy, improving Tuberculosis (TB) prevention and cure, reduce prevalence of non-communicable chronic diseases, facilitate health system reforms and develop committed and competent individuals.

The emergence of COVID-19 however has serious ramifications for the short, medium and long term as it threatens the achievement of the medium term targets and in turn the Department's contribution to the SDGs. The management of COVID-19 has a direct impact on the health system and requires a focused balance to ensure that health care delivery is rendered in an equitable manner to promote the well-being of inmates. The Department is proactively assessing COVID-19 developments, identifying and adjusting its directives to combat the spread of the virus and to minimise the impact on service delivery. The effects of the pandemic are likely to be wide-ranging and are difficult to predict due to the uncertainty of the future resurgence of infection. The Department's response considers short-, mediumand long-term interventions with a focus on the potential opportunities that can be optimised.

The Department implements a comprehensive response to HIV and AIDS, TB and non-communicable diseases following the lead from the DoH and supported by partners such as SA partners and TB/ HIV Care, appointed through the United States President's Emergency Plan for AIDS Relief. Partner support resulted in 99% of inmates being initiated on antiretroviral therapy (ART) while the TB cure rate was

93% in line with the UN 90-90-90 strategy towards an increased life expectancy of South Africans to 70 years by 2030. The treatment of non-communicable diseases such as diabetes and hypertension is additionally augmented by therapeutic diets to optimise the health status of inmates and ultimately eliminate complications.

The detection of communicable diseases, such as HIV, TB and COVID-19 will receive greater attention over the medium term through intensification of prevention, detection and mitigation strategies such as contained in the SOPs for the preparedness, detection and response to COVID-19 in the Department. These strategies include early identification and isolation of COVID-19 confirmed cases; quarantining close contacts of confirmed cases and practising social distancing. At the same time, the implementation of guidelines that are aligned to the DoH ensures a seamless movement of inmates with various communicable infections (Hepatitis C, TB, HIV, etc.) and non-communicable diseases (diabetes, hypertension, mental illness) for adequate disease management.

The delivery of health care services over the MTEF period will focus on collaborative strategies with all relevant stakeholders to leverage on identified opportunities to improve the health and well-being of inmate-patients. The strategies which include establishment of a Central Procurement Unit for pharmaceutical and medical related products to enhance efficiencies in procurement processes thus preventing stock outs of essential pharmaceutical and medical related products and the implementation of a courier model for distribution of pharmaceutical and medical related products that will ensure continuous availability of pharmaceutical products required for the treatment of communicable and non-communicable diseases. An integrated health care approach will further prove beneficial in ensuring a continuum of care between correctional facilities, public and private health institution referrals so as to assure delivery of appropriate, high quality medical care.

The Department is participating in the compulsory National Treasury transversal contracts to procure health care related goods and services which result in cost advantages due to the large scale procurement by participating institutions. Training of health care professionals will be provided on a continuous basis to ensure a competent complement of staff and safe care to protect inmates who access the health care services. Monitoring and Evaluation (M & E) will focus on programmatic reviews combined with learning opportunities by allowing health care providers to identify and improve deficiencies in the management of health care system and implement corrective measures to improve efficiencies.

6.3 Updated Internal Environment

There can be no doubt that a significant proportion of people living in South Africa are struggling to meet their basic survival needs. Given these stark socioeconomic conditions, it is no surprise that South Africa has high crime rates. Inequality in South Africa is also exceptionally high by global standards. Rising inequality, poverty and unemployment is exacerbated by the COVID-19 pandemic, with the greatest impact physically and emotionally being felt by the poor. The well-accepted correlation between levels of inequality and crime is of particular concern. Violent crime is particularly prevalent in South Africa, and in the minds of South Africans however, South Africa also has high rates of property crime. The significant decline in economic activity partially due to COVID-19, unemployment and poverty could result in increased levels of crime, civil disobedience and protests. South Africa's unemployment rate increased to 32.5% in the fourth quarter from 30.8% and 23.3% in the third and second quarters respectively. Meanwhile, the swelling ranks of the unemployed mean that poverty and inequality are on the rise, a trifecta of challenges reflected in South Africa's high rates of crime. Crime reduction measures are likely to be affected by economic and other factors, including extreme levels of poverty and unemployment, a propensity for violence, drug and alcohol abuse, technological advancement of criminals, mass protests, etc.

The Department is cognisant of the increased levels in serious crimes, as reported on the 2019/20

SAPS Crime Statistics Report, and the implications that this has for the number of people who are convicted and sentenced. An increase in the number of crimes will consequently lead to an increase in the number of inmates within correctional facilities. High incarceration rates impose significant human and financial strain on the Department. The strict mandatory sentencing of incarceration increases the probability and length of incarceration. As a result, a decrease in crime rate will not have a significant effect on the inmate population which will continue to grow since more people enter correctional facilities than those being released.

The criminal justice legislation and policy that influences in mate populations include the affordability of the bail amount set, case flow management and minimum sentencing provisions. The key drivers of the remand detainee population are the increase in serious crimes and the increase in the use of pretrial detention by courts without the option of bail. Since the Department is on the receiving end of the criminal justice process, it has limited control over the number of persons flowing into the system on a daily basis. The expected growth in the inmate population will have direct implications, firstly, for inmates who have to spend longer incarceration periods confined in increasingly overcrowded conditions, increasing pressure on resources and infrastructure, and also exacerbating the risks associated with security, safety and health.

The COVID-19 crisis, perhaps like no other event in living memory, has cast a bright light on the fragilities and inequities that plague society. There are few places where that light penetrates these dark realities more than the CJS. The effect mandatory minimum sentence regime has contributed to the increased levels of overcrowding within correctional facilities exceeding the maximum occupancy rate, with some correctional facilities that are over 150% capacity. These conditions make it near impossible to maintain social distancing guidelines and poses serious threats to not only the health of inmates, but also to communities outside. Hygiene standards in correctional facilities are commonly much lower than those found in the community.

The Correctional Services COVID-19 Disaster Management Response Strategy, complements infection prevention and control measures with the release of inmates within correctional facilities, through the Special Parole Dispensation, focussing on individuals with pre-existing health conditions, those whose release would not result in compromising public safety, and those approaching the end of their sentence, as well as attitude and behavioural changes towards former inmates, which would go a long way in reducing recidivism. Prevention procedures are followed in accordance with the COVID-19 occupational health and safety measures and include the sanitisation of facilities, temperature checking of officials, inmates and visitors on or prior to entering the premises, supply of protective gear including gloves and masks and following social distancing protocol, amongst others. This task is challenging because, in many cases, the disease can manifest itself as a mild respiratory illness and begin gradually.

In the longer term, systemic, structural changes are required to prepare for future pandemics. The COVID-19 experience has highlighted three systemic realities of the CJS. Firstly, due to overcrowding, correctional facilities are ill-equipped to withstand the harsh impacts of pandemics and infectious diseases. Secondly, mandatory sentencing legislation has steadily increased rates of incarceration, contributing to the overcrowding in correctional facilities; and lastly, the widespread release of inmates in a matter of a few short months has highlighted the arbitrary nature of laws, and particularly, criminal laws and punitive sanctions. The way in which the Department has adapted to this emergency will influence society and the CJS.

6.3.1 Organisational Environment

The COVID-19 pandemic has reduced performance within the Department and will further weaken resources already in limited supply. The widespread funding pressures will impact the attainment of set outcomes of the Department insofar as the expansion of the post establishment initiatives is concerned. Measures put in place to curtail the rate of infection through the implementation of the Disaster Management Regulations has reduced the Compensation of Employees (COEs) budget by an estimated R2.7 billion in the 2021/22 financial year which will result in the abolishment of critical funded posts within the Administration and the Rehabilitation and Care programmes of the Department.

The revised number of posts for the MTEF period will have the following impact on the Department:

- » Insufficient staff to render services.
- » Misalignment of the structure and functions.
- » Changes in the reporting lines for the affected functions.
- » The need to merge some functions.
- » Increased physical fatigue and stress among employees as a result of the increased workload.
- » Challenges with governance and compliance with polices due to the reduced capacity available to perform the work.

In order to manage the impact of these challenges, the Department will, among others, implement the following interventions:

- » Enter into Memorandum of Agreements to strengthen human resource capacity with other government departments such as the DoH, Department of Education and Social Development for the provision of care and rehabilitation programmes.
- » Reassess and gradually abandon the use of contract employees since the cost of employing this category of employees can be exorbitant.
- » Streamline posts under support functions with the aim of capacitating core functions.
- » Reprioritise the COE budget to the programmes where posts can be filled within a short timeframe.

The reduction in the COE budget will further have a negative impact on the implementation of developmental programmes e.g. learnerships and internships which are the Department's foremost youth development and empowerment programmes, and which also create the pool for the entry level employment of youth. This limits the Department's ability to respond to the imperatives of the National Development Plan, the National Skills Development Strategy, the Human Resources Development (HRD) Strategy and other strategic frameworks which direct the employment and empowerment of youth. The Correctional Services learnership target of 2 064 will have to be halved due to the budget constraints and to ensure compliance with COVID-19 protocols at the colleges. The training and development budget has also been reduced due to the budget shortfalls. The Department will be placing more emphasis on e-learning as an alternative mode of learning.

The COVID-19 pandemic has shown a direct impact on the Departmental workforce. The daily health risks experienced by officials cannot be separated from the broader environment. The health threat to officials, economic and social disruptions related to the pandemic as well as work pressures from working with reduced capacity are threatening the psychosocial wellbeing of officials. According to a report by the Government Employees Medical Scheme, the Department ranked as number three among the departments most affected by COVID-19. The high number of reported COVID-19 cases has resulted in higher costs of medical expenses incurred by the Department. The pandemic requires the Department to revisit its Integrated Employee Health and Wellness plans and to bring about creative and innovative ways in addressing the wellness needs of officials in a robust but caring and supportive manner.

The Department has strengthened its OHS measures, adapted working arrangements (to deal with staff absences, to reduce workplace congestion and exposure to the virus and to accommodate vulnerable employees) and scaled up its employee assistance programme. There has been a shift in the focus of training in the workplace skills plan to awareness-raising related to infection prevention control and other protocols to ensure the prevention, containment and treatment of infections. It has been necessary to empower officials not only to ensure their own health and safety but to implement the strategies and protocols to combat the outbreak and limit its impact on offenders while still ensuring the sustainability of the programmes in the fulfilment of the Department's mandate. The Department has intensified its awareness programmes by promoting healthy lifestyles during this period through internal communication informed by global trends on wellness perspectives. COVID-19 awareness training will continue to introduce new knowledge in line with international developments related to the pandemic and to entrench the knowledge on existing protocols and strategies. Focus will be on managing recovery, reintegrating officials into the workplace and a holistic approach to a healthy lifestyle and working habits. Other mediums of communication and technological forms will be explored in order to strengthen and create high intervention impact by continuously providing valuable information and educational campaigns on physical wellness, mental wellbeing, communicable and non-communicable diseases to employees of the Department.

In terms of occupational health and safety, going forward there will be greater emphasis on individual and environmental risk assessments to mitigate risks where they are identified. The Department remains a labour-intensive Department, dependent on human resource capacity to deliver on its mandate. Critical to the optimisation of the existing human resource capacity, will be the need to introduce technologies and to empower officials to adapt in keeping with the imperatives of the 4IR. Automation of a number of human resources processes are planned to improve human resource transactional efficiency to serve officials within the organisation and those joining the Department. The quest for equity in terms of gender and for people with disabilities requires that measures are put in place to empower and accommodate women and people with disabilities.

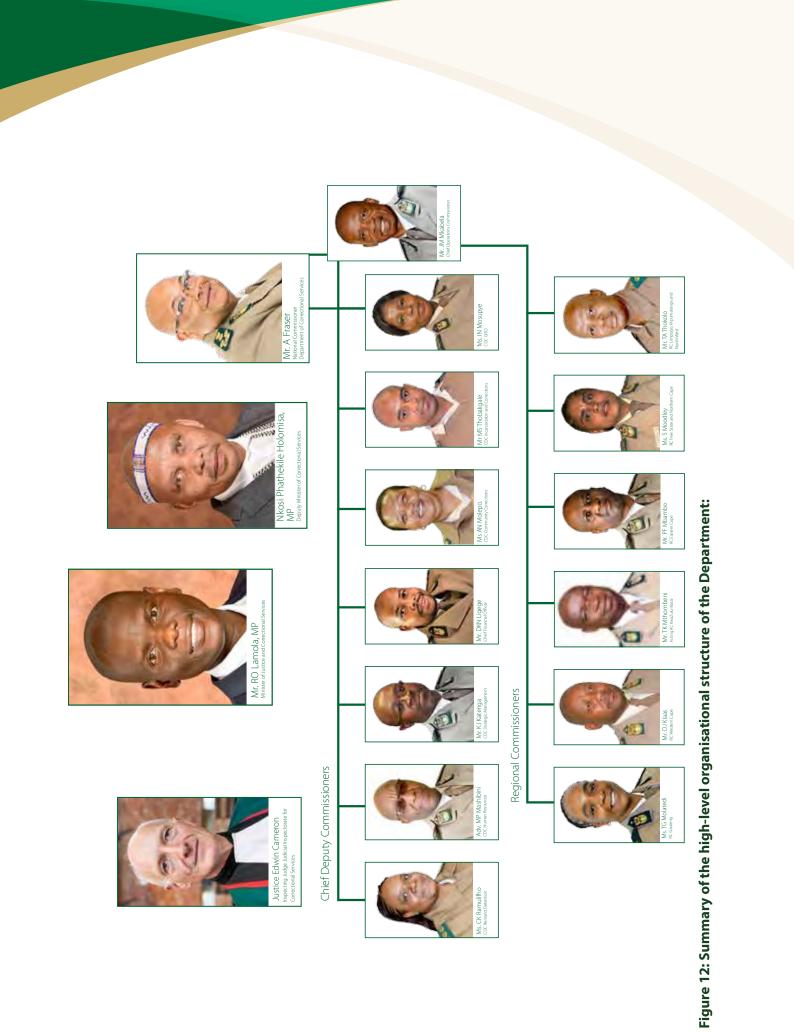

Table 2: Staff establishment

Salary level		approved ishment	Total filled and vacant	Vacancy rate	Additional to the establishment
	Filled	Vacant			
Internships /Learnerships	-	-	-	-	139

Grand total	38 878	3 553	42 431	8,37%	1 906

The COVID-19 pandemic and lockdowns have resulted in unintended consequences on the capacity of the Department such as the temporary suspensions of recruitment processes. The departmental HR-related COVID-19 response intervention measures includes recruitment drives that are responsive and inclusive of persons with disabilities and women and as such, the recruitment process markets the Department as an employer of choice. In addition, the Department will pursue partnerships with institutions of higher learning, the disability sector and disabled job seekers themselves. Departmental healthcare employees should have sufficient training knowledge and skills on disability management and be able to provide individualised support.

Table 3: Summary of critical occupations

Critical occupations		approved ishment	Total filled and vacant	Vacancy rate
	Filled	Vacant		
Administrative line function and support personnel	5	-	5	0,00%
Artisan and support personnel	512	174	686	25,36%
Communication and information related personnel	2	-	2	0,00%

Grand total	38 878	3 553	42 431	8,37%

6.3.2 Status on women, youth and Persons with Disabilities (PWDs)

Persons with disabilities increased from only 0.65% in 2015 to 0.77% in 2020. Despite the increase noted over the five year period, the Department has not been able to attract sufficient applicants from the disability community due to the safety risks within the operating environment as well as the inaccessibility of correctional facilities.

An overall improvement of approximately 6% in female representation is noted when comparing the trends between 2015 and December 2020; although the recorded progress is encouraging, males remain overrepresented by about 2% at decision-making levels. In order to comply with the 50/50 requirement and ensure equitable representation by 2023, selection panels and the delegated authority must prioritise female appointments in senior management levels to comply with the Employment Equity requirements and legislation.

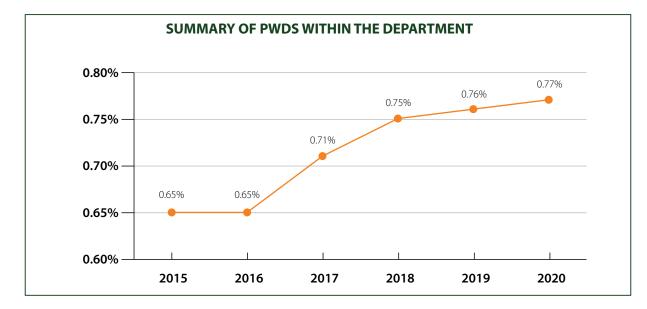

Figure 13: Summary of PWDs employed by the Department for the period 2015 to 2020 (December)

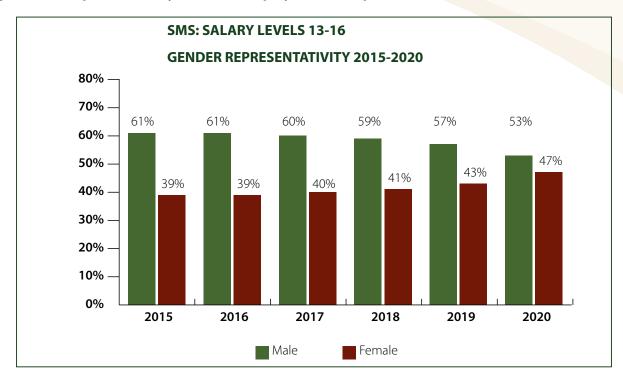

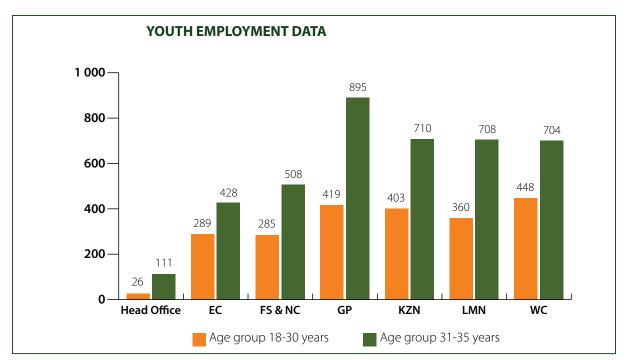

Figure 14: Comparative analysis of SMS employees for the period 2015 to 2020 (December)

The representation of young people within the Department's workforce, at the end of 2020, was 6 292 employees ranging from 18 – 35 years. The Department is committed to prioritising youth employment through the filling of vacant positions, notwithstanding requisite skills and experience required, as well as the employment of qualifying

learners that have completed the learnership programme. Although the normal recruitment and selection processes were impacted by COVID-19, the Department made significant progress with the employment of youth through the appointment of the South African National Defence Force reserves.

6.4 Overview of the 2021 Budget and MTEF Estimates

The National Treasury Fiscal Framework extends support to the economy and public health services in the short-term, while ensuring the sustainability of public finances in the medium term. The main budget revenue in the fiscal framework is projected to be R1.35 trillion, or 25.3% as a share of GDP in 2021/22. This rises to R1.52 trillion in the outer year (2023/24) of the MTEF. At the same time, non-interest spending will remain steady at approximately R1.56 trillion over the next three years but will decline as a share of GDP from 29.2% in 2021/22 to 26.2% of GDP in 2023/24. The country's borrowing requirement will remain well above R500 billion in each year of the medium term despite the modest improvements in the fiscal position. Consequently, gross loan debt will increase from R3.95 trillion in the current fiscal year to R5.2 trillion in 2023/24. The Fiscal Framework aims to close the main budget primary deficit with a primary surplus expected on the main budget in 2024/25. Government debt will stabilise at 88.9% of GDP in 2025/26 and the ratio will decline thereafter. The total consolidated spending amounts to R2 trillion each year over the medium term, the majority of which goes towards social services.

The overall budget of the Department is projected to grow at an annual average rate of 5.6%, from R25.2 billion in 2021/22 to R25.6 billion in 2023/24. The Department has as a responsibility to keep inmates detained in correctional facilities in safe custody until they are legally released. While adhering strictly to its function the Department acknowledges the fundamental rights of inmates which are embodied in the Constitution of the Republic of South Africa (Act No. 108 of 1996, as amended). It is therefore necessary to incarcerate and treat all inmates in a humane manner and to create a climate which is conducive to rehabilitation. The Department is furthermore committed in maintaining universally acceptable standards and norms with regard to the treatment of offenders and in particular those norms, standards and guidelines laid down by the United Nations on the treatment of offenders.

The distribution of expenditure per programme and economic classification is illustrated in the figure below.

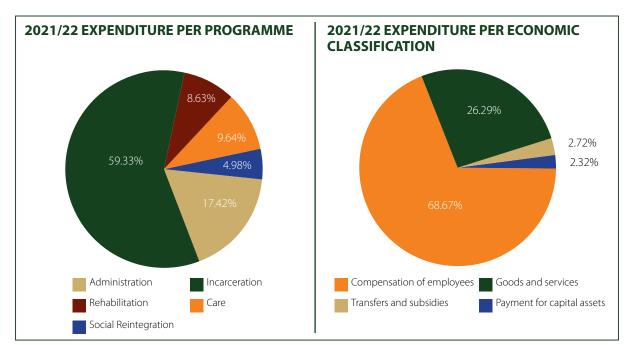

Figure 16: 2021/22 Expenditure per Programme and Economic Classification

An estimated 58.4% (R44.7 billion) of the Department's spending over the MTEF period is in the Incarceration programme. As a result of Cabinet-approved reductions to the baseline of the Department amounting to R11 billion over the medium term (R3.3 billion in 2021/22, R4.3 billion in 2022/23 and R3.4 billion in 2023/24), overall expenditure is expected to increase marginally from R25.2 billion in 2021/22 to R25.6 billion in 2023/24.

The reductions are effected mainly on allocations for Compensation of Employees. Contracts for nonessential personnel will be terminated and natural attrition will be allowed to take place, leading to a projected decrease in the number of personnel from 37 836 in 2021/22 to 36 809 in 2023/24. These reductions will affect the capacity of the Department to deliver corrections, rehabilitation and wellness services over the MTEF period as well as limit the ability to implement self-sufficiency and sustainability projects. An estimated 67.4% (R51.5 billion) of the expenditure over the MTEF period is earmarked for Compensation of Employees.

Providing detention that is humane, safe and secure

Over the medium term, the Incarceration programme is expected to spend R44.734 billion which is 58.4% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 1.8 % which is expected to increase over the medium term to 2023/24 by 0.4%. Funding under the Incarceration programmes makes provision for security operations, facilities, remand detention, offender management, the administration and profiling of inmates and the consideration of offenders for release or placement into the system of community corrections.

Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Incarceration programme. The bulk of this decrease was made against the Compensation of Employees budget which decreased by R7,340 billion over the medium term. Further to this the infrastructure projects not yet contracted were reduced by R728,5 million. The remainder of the budget cuts were made against Transfers and Subsidies for service termination benefits and Goods and Services items under this programme such as Repairs and Maintenance, Inventories for lower grade coal, Subsistence and travel and Fleet Services.

The work of the Department is labour intensive hence the Compensation of Employees budget accounts for most of the spending of the programme, i.e. 71% of the budget of the programme over the medium term. The allocation of R23,768 billion over the medium term within the Security Operations sub-programme includes provision for the security equipment for security personnel. The sub-programme accounts for an estimated 53.1% of the total budget of the programme over the same period. The declining budget will require the Department of identify innovative security initiatives that will support and enhance the service delivery mandate of the Department.

Providing needs based rehabilitation

The Rehabilitation programme is expected to spend R6.830 billion over the medium term, which is 8.7% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 6.5% and is expected to increase over the medium term to 2023/24 by 5.5%. Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Rehabilitation programme. The bulk of this decrease was against the Compensation of Employees budget which decreased by R336,8 million over the medium term. The remainder of the budget cuts which were against Goods and Services items under this programme such as Consumables: stationery and printing and Subsistence and Travel due to the use of electronic media to convene meetings, workshops etc.

An estimated 73.2% (R5 billion) of the Rehabilitation programme is allocated for spending on Compensation of Employees. The remaining 26.8% (R1.8 billion) of planned spending is allocated for supplies at various sites, including farms and production workshops where work opportunities are provided to offenders, such as at agriculture projects, abattoirs, bakeries, textile, shoe factory as well as wood and steel workshops. An additional amount of R87,2 million has been allocated over the medium term for the replacement of workshop and agricultural equipment. Rehabilitation and corrections will require working together effectively within the framework of integrated governance

Providing health care services

The Care programme is expected to spend R7.69 billion over the medium term which is 10.1% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 3.3% and is expected to increase over the medium term to 2023/24 by 1.1%. Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Care programme. The bulk of this decrease was against the Compensation of Employees budget which decreased by R81,5 million over the medium term. The remainder of the cuts were made against Goods and Services items under this programme largely under Inventory: Food and food supplies as well as Inventory: Medicine in line with recent expenditure trends.

Reintegrating offenders into communities

The Social Reintegration programme is expected to spend R3.557 billion over the medium term, which is 4.5% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 3% and is expected to increase over the medium term to 2023/24 by 3.9%. Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Social Reintegration programme. The net decrease against the Compensation of Employees budget of the programme was R6,4 million over the medium term. Victim offender dialogues are budgeted for in the Community Reintegration sub-programme, with an allocation of R199.2 million over the MTEF period. A total of R3.2 billion (90%) of budget of the programme is earmarked for Compensation of Employees because of the labour intensive nature of the work in this programme.

Part C Measuring Our Performance

7. Programme Budget Structure

PROGRAMMES	SUB-PROGRAMMES	PURPOSE
PROGRAMME 1: ADMINISTRATION	Ministry	To support the Executive Authority in carrying out oversight executive responsibilities of the Department.
	Judicial Inspectorate for Correctional Services (JICS)	To provide for the independent oversight relating to the treatment of inmates and their conditions.
	Management	Provide the administrative management, financial, Information and Communications Technology (ICT), research, policy coordination and good governance support functions necessary for all service delivery by the Department and in support of the function of the Ministry.
	Human Resources (HR)	Improve HR capacity and management to enable the Department to fulfil its mandate.
	Finance	To provide effective and efficient financial and supply chain management (SCM) services.
	Assurance Services	To provide a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes.
	Information Technology (IT)	To create business value through provisioning of reliable integrated and secured ICT infrastructure and business application system to ensure effective strategic alignment and enhancement of business processes.
	Office Accommodation	Facilitate the provision of community corrections offices, including satellite offices and service points to enhance community reintegration.
PROGRAMME 2: INCARCERATION	Security Operations	Provide safe and secure conditions for inmates, consistent with human dignity.
	Facilities	Provide physical infrastructure that supports safe custody, humane conditions and the provision of correctional and development programmes, care and general administration.
	Remand Detention	Ensure effective and efficient remand detention system consistent with human rights in a safe and secure environment.
	Offender Management	Provide safe and secure conditions consistent with human dignity through effective administration and management of offenders.

PROGRAMMES	SUB-PROGRAMMES	PURPOSE
PROGRAMME 3: REHABILITATION	Correctional Programmes	Provide needs-based correctional programmes targeting offending behaviour based on the Correctional Sentence Plans (CSPs). The aim is to raise awareness, provide information and develop life skills.
	Offender Development	Provide offenders with needs-based programmes and interventions to facilitate their rehabilitation and personal development.
	Psychological, Social and Spiritual Services	Manage and ensure the rendering of needs- based psychological, social work and spiritual care services to inmates and persons under correctional supervision with the aim of improving health and emotional wellbeing and assisting in their rehabilitation and reintegration into the community.
PROGRAMME 4: CARE	Nutritional Services	Provide inmates with appropriate nutritional services during the period of incarceration.
	Health and Hygiene Services	To ensure that inmates are provided with appropriate access to healthcare and hygiene services.
PROGRAMME 5: SOCIAL REINTEGRATION	Supervision	Provide effective supervision of offenders placed under correctional and parole supervision in order to enhance public safety.
	Community Reintegration	Provide and facilitate support systems for the reintegration of offenders into society.
	Office Accommodation: Community Corrections	Facilitate the provision of community corrections offices, including satellite offices and service points to enhance community reintegration.

7.1 Programme 1: Administration

7.1.1 Programme purpose

Provide strategic leadership, management, support and judicial inspection services to the Department.

7.1.4 Explanation of planned performance over the medium-term period

The outcomes and outputs of the Administration Programme serve as an enabler for the delivery of the core mandate by the Departmental line function Programmes. The Programme further provides leadership to the Department to enable it to deliver a high performing ethical organisation. To this end, the Department will identify service delivery gaps and capture key ones among those, in the form of a Service Delivery Improvement Plan. The Administration Programme brings together a range of support functions, which work collectively and consistently together to support service delivery by offering expert knowledge, specialised advice and effective internal controls. Sluggish economic growth, high inflation and rising debt servicing costs will require stringent fiscal discipline. The Administration Programme will therefore work towards the simplification of administrative processes within the Department and improve support service value-add to the organisation in order to promote and optimise compliance. Well-governed public institutions also contribute towards 'Building a capable, ethical and developmental State' that government aspires to. The Administration Programme also seeks to contribute towards the government Priority One: Building a capable, ethical and developmental State which requires political stability, good governance and adequate resources to be able to support the line function Programmes.

The Department Investigation Unit (DIU) will undertake to finalise 50% of all investigations on reported allegations which will increase 5% annually over the MTEF. The set targets are reliant on the availability investigators, accessibility to correctional facilities and officials who provide evidence during investigations. The Code Enforcement Unit (CEU) operates in terms of section 95B of the Correctional Services Act (Act No. 111 of 1998, as amended), prosecuting in disciplinary hearings and arbitration from investigations referred to the CEU by the DIU in terms of section 95A. The investigation processes have been hampered due to the COVID-19 pandemic which reduced the number of investigations completed. Disciplinary proceedings are further affected by the unavailability of people either as HR representatives or as witnesses or chairpersons. There will be continuous sensitization on the pivotal role of fighting fraud and corruption across the Department to sustain the commitment in fighting corruption. The Department will continue to prioritise disciplinary hearings and arbitrations emanating from section 95A and B matters by maintaining the target of 95% on percentage of officials charged and found guilty for corrupt activities.

The Government Communication Excellence Tool report, which measures and highlights overall national government communication performance on the COVID-19 pandemic, released by the Government Communication and Information System GCIS at the end of December 2020 rated the Department highest in terms of number of articles issued using internal publications as well as number of statements issued; the Department was rated second with regards to number of radio interviews conducted, community outreach and stakeholder engagements as well as web-entries posted, and seventh in respect of combined communication outputs. The proactive communication stance by the Department will be further enhanced over the MTEF. The COVID-19 and public education awareness that has been intensively rolled out with the Correctional Service community will continue over the MTEF from a target of 210 in 2020/21 to 150 in 2021/22 and 70 in 2022/23 taking into consideration that the pandemic is now a common phenomenon and some of the common practices will continue to be communicated i.e. the washing of hands, sanitising, social distancing, etc. Communication remains an integral solution in fighting the surge of the pandemic and will continue to be rolled-out in the MTEF.

Gender equality and inclusion of women and youth in the economic stream is central to the South African Economic Reconstruction and Recovery Plan as pronounced by the President of the Republic of South Africa. The Department will direct its efforts towards ensuring compliance with the SMS Employment Equity target to increase the participation of women at decision making levels thus fulfilling Cabinet requirements for a 50% male and 50% female equity across the MTEF. The Department acknowledges the importance of inclusion of PWDs within its workforce as part of the transformation agenda and Employment Equity Act (Act No. 55 of 1998, as amended), among others. The Department has maintained an average of 0.77% of persons with disabilities as part of its workforce. Over the MTEF, access to persons with disabilities will be increased gradually by 0.06% taking into consideration the challenges brought about by the current fiscal constraints on the COE budget.

Department is committed to creating The opportunities for youth and in doing so will make them active participants in the South African economy. The Recruitment Strategy of Department aims to ensure that 20% youth employment forms part of forthcoming recruitment process. It is envisaged that the strategy will increase the appointments of youth to 40% of successfully recruited candidates by 2023/24. In view of the fact that the COVID-19 pandemic is likely to continue for the foreseeable future the COVID-19 awareness sessions which commenced in the financial year 2020/21 will continue until the end of the first quarter of 2021/22. The Department plans to have a total of 576 awareness sessions nationally in the first quarter of 2021/22. Sensitisation and reminders will continue through communication to employees to ensure that the spread of COVID-19 is contained.

The Department will leverage its procurement spend to advance historically disadvantaged persons by giving preference to designated groups (as aligned to the PPPFA), exempt micro enterprises (EMEs), and qualifying small enterprises. Bids awarded to designated groups are multi year awards that are between three to five years long. While the Department may be unable to award bids to designated groups in a particular financial year these groups are still supported through awards that have been made in the prior years. The budget cuts that are presented to the Department require a review of activities that would be delivered through quotations and bids to provide support to designated groups and improve their participation to the economy. The Department has prioritised the development of a

business case for a revenue generation and retention mechanism as part of its drive towards realising a self-sufficiency in a shrinking economic climate. The business case will outline a suitable mechanism that is predicated on the principles of maximising return on investment. The mechanism will have the autonomy to optimise investment and utilisation of the workshops for improved service delivery whilst saving costs to the State.

The Department has been subjected to qualified audit outcomes particularly in the last four years i.e. from the 2016/17 to 2019/20 financial years. In the 2021/22 financial year, the intention is have an unqualified audit opinion with reduced findings as a build up towards a clean audit administration in 2022/23 and beyond. To enable this, the Department intends to (i) develop an audit outcome improvement strategy for adoption across the organisation, (ii) monitor the implementation of the audit action plans on a monthly basis to ensure adequacy and effectiveness thereof (iii) coordinate information to ensure relevance, consistency, and accuracy of reported information to clear audit findings and (iv) full compliance to the internal control mandate as provided for by Section 38(1)(a)(1) of the Public Finance Management Act (Act No. 1 of 1999, as amended). To further achieve an ungualified audit, the Department plans to investigate and finalise cases relating to irregular, fruitless and wasteful expenditure, improve risk management maturity through rigorous facilitation, monitoring and reporting on risk management activities and improve internal control maturity through support and coordination of audit action plans and conducting regular compliance assessments.

7.1.6 Resource contribution to the achievement of outputs for Programme 1

The Administration programme manages the overall strategic and operational functions of the Department which include policy direction; strategic leadership; coordination and facilitation of multilateral and bilateral programmes; integrated planning and programme support; provisioning of financial and human resource management services; communication and ICT management; coordination of the provisioning of internal legal advice services, as well as, audit and risk management oversight.

Over the medium term, the Administration programme is expected to spend R13.487 billion which is 18,4% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 10.7% however it is expected to decrease by 5% over the medium term.

The Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Administration programme. The bulk of this decrease was against the Compensation of Employees budget which decreased by R3,367 billion over the medium term. The remainder of the cuts were against Goods and Services items, largely under the subsistence and travel item as well as fleet services due to the use of electronic media to convene meetings, workshops etc. Deductions were also, to a lesser extent, made against logistics consultants, venue and facilities, consumables: stationery and printing and uniform.

7.2 Programme 2: Incarceration

7.2.1 Programme purpose

Provide for safe and secure conditions of detention consistent with maintaining the human dignity of inmates. Administer, profile and consider offenders for release or placement into the system of community corrections.

7.2.4 Explanation of performance over the medium-term period

The Department continues to prioritise the implementation of the JCPS MTSF commitments that are articulated in the national development planning agenda outlined in Priority Six (social cohesion and safe communities), aligned to the vision: "All people in South Africa are and feel safe". The Department continues to work in earnest with all sectors of society to ensure the realisation of this vision by creating safe and secure conditions for inmates, officials and stakeholders through a comprehensive approach that addresses offending behaviour. Discipline and structure shall be maintained with no more restriction than is necessary to ensure safe custody, the secure operation of the correctional facilities and a wellordered community life. This principle requires a proper risk assessment on admission to a correctional facility in order to decide the most appropriate security level for each inmate. The Department is also committed to preventing and combating the spread of COVID-19, in line with the Disaster Management Strategy by providing both officials and inmates with prerequisites to protect themselves against the spread of the virus. Regular reviews will be conducted to ensure that low risk inmates are reallocated to less restrictive conditions, where possible.

The COVID-19 pandemic has had a negative impact on the detection of contraband in correctional facilities due to the physical distancing that was required as one of the strategies to reduce the spread of COVID-19. The requirement to conduct thorough searching had caused anxiety amongst officials and inmates as the close contact increases the risk of infection. There will be continued use of PPEs when conducting searches as this is a primary function conducted within correctional facilities to detect the presence of contrabands which could lead to escapes, assaults and the prevention of unnatural deaths (homicides). Security breaches can be largely attributed to overcrowding, dilapidated infrastructure and non-compliance with security policies. The introduction of body scanners will assist in the detection of contrabands in the possession of inmates or officials which will assist in curtailing

security incidents. Over the MTEF, the Department will continue to reduce all security incidents across correctional facilities.

The Master Infrastructure Plan is designed in support of the National Spatial Development Framework, which contributes to a peaceful, prosperous and transformed South Africa as articulated in the National Development Plan. The Master Infrastructure Plan is intended to provide facilities in line with the new generation design and norms to create safe and secure accommodation for rehabilitation. The Department will finalise the construction at the Emthonjeni Youth Centre in 2021/22 which will be followed by Parys in 2022/23 and Brandvlei in 2023/24. The Department is mindful of the budget constraints and the slow pace of delivery on infrastructure projects due to the COVID-19 pandemic which will have an adverse effect on the upgrading of correctional facilities. This will require close monitoring of the infrastructure programme, review of contractual obligations, force majeure clauses, change in controls and entitlement for time extensions in order to mitigate against project risk related with construction suspension and standing time during the applicable disaster management lockdown periods. The maintenance and upgrading of facilities through own resource projects will be executed using offender labour to enhance offender skills.

The economic and social disruption caused by the COVID-19 pandemic has increased the levels of extreme poverty in the country and subsequently increased the number of remand detainees within correctional facilities. The revision of the legislation relating to mandatory minimum sentencing and duration of sentences, imposed bail protocols has an impact of the remand detention population. Overcrowding in remand detention population consists largely of persons who have allegedly committed serious crimes and who have not been granted bail. The Department will increase the percentage of Remand Detainees that are subjected to continuous risk assessment from 40% to 65% as it is anticipated that with the availability and roll out of COVID-19 vaccines in the country, the activities within the CJS will slowly move towards a manageable normality over the MTEF. The Department aims to maintain the 65% remand detainees subjected to CRA over the MTEF.

The reduction of overcrowding within correctional facilities, although complex, remains a high priority within the Department. The creation of additional bedspace is an important strategy to address the overcrowding challenge within the correctional facilities; the improved automation of the bedspace management tool will strengthen the reporting of accurate overcrowding rates. The 2019/2020 Special Remission resulted in an 8% decrease in the overcrowding level with a further decrease of 16.13% from the implementation of 2020/2021 Special Parole Dispensation. The overcrowding level is expected to gradually increase over the MTEF period although this will be within manageable levels when compared to the prior years. The rate with which the envisioned increase in the overcrowding level will unfold over the MTEF is dependent on the increase or decrease in the bedspace as well as the growth in the arrest and conviction rates. The targeted growth for the MTEF is 30% in 2022/23 and 32% 2023/24. However, the completion of the infrastructure projects of Emthonjeni Youth Centre, Parys and Brandvlei will reduce the projected increase.

The CSPB must ensure that thorough consideration is conducted to assess whether the offending behaviour has been addressed before placement is approved in order to reduce reoffending by offenders after release, thus ensuring safer communities. The potential gains from the review of the parole administration system include improved recruitment and retention of skilled professionals such as criminologists and psychologists involved in the placement and release considerations, victim and community participation and empowerment to ensure adequate involvement in parole considerations. The current challenges within the parole system include: inconsistencies in the decision making of the Parole Boards, Roving Boards and Review Mechanisms among others. In order to address these challenges new decisionmaking and reviewing authorities will be proposed. Practical parole consideration process and victim participation will take place at Case Management

Committee and Parole Boards processes will be administrative. The CSPBs will ensure responsible consideration and approval for placement of offenders serving determinate sentences on parole, day parole, medical parole or correctional supervision with an increase from 55% to 59% over the MTEF. This requires, among others, effective case management processes that timeously identifies and addresses risks of reoffending before offenders become eligible for consideration for placement. As the country navigates its way through COVID-19, there is likely to be an increase of offenders' profiles approved for placement by the CSPBs.

7.2.5 Programme resource considerations

Department of Correctional Services

7.2.6 Resource contribution to the achievement of outputs for Programme 2

Over the medium term, the Incarceration programme is expected to spend R44.734 billion which is 58.4% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 1.8 % which is expected to increase over the medium term to 2023/24 by 0.4%. Funding under the Incarceration programmes makes provision for security operations, facilities, remand detention, offender management, the administration and profiling of inmates and the consideration of offenders for release or placement into the system of community corrections.

The Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Incarceration programme. The bulk of this decrease was made against the Compensation of Employees budget which decreased by R7,340 billion over the medium term. Further to this the infrastructure projects not yet contracted were reduced by R728,5 million. The remainder of the budget cuts were made against Transfers and Subsidies for service termination benefits and Goods and Services items under this programme such as Repairs and Maintenance, Inventories for lower grade coal, Subsistence and travel and Fleet Services.

During the MTEF period the Department will continue to fund activities aimed at providing safe and secure conditions for the incarcerated population, consistent with human dignity, as well as providing protection for personnel and the public. The budget supports the security function of the Department which is a fundamental pillar that cuts the value chain of incarceration, rehabilitation and social reintegration. It therefore requires a proactive, innovative and responsive approach.

The work of the Department is labour intensive hence the Compensation of Employees budget accounts for most of the spending of the programme, i.e. 71% of the budget of the programme over the medium term. The allocation of R23,768 billion over the medium term within the Security Operations sub-programme includes provision for the security equipment for security personnel. The sub-programme accounts for an estimated 53.1% of the total budget of the programme over the same period. The declining budget will require the Department of identify innovative security initiatives that will support and enhance the service delivery mandate of the Department.

The Department will spend R1,563 billion on the upgrading and refurbishment of correctional and other facilities, over the medium term, to minimise overcrowding, improve the conditions of correctional facilities, improve security and observance of the human rights of inmates. The Department also funds the activities of correctional supervision and parole boards and ensures that eligible offenders are considered for parole through cases submitted by Case Management Committees (CMCs). CMCs are directly responsible for monitoring safe detention, participation in programmes, assessing behaviour and timely recommendations pertaining placement or release of offenders in consultation with the Supervision Committee in the system of Community Corrections.

7.3 Programme 3: Rehabilitation

7.3.1 Programme purpose

Provide offenders with needs-based programmes and interventions to facilitate their rehabilitation and enable their social reintegration.

7.3.4 Explanation of performance over the medium-term period

The penological principles of treating offenders have evolved over the years changing from that which viewed South African facilities as primarily to remove offenders from society and incarcerate them for the duration of their sentence to that of the present which seeks to rehabilitate offending behaviour. The punitive correctional system resulted in offenders remaining unrepentant and returning to a life of crime after their release. The reformed correctional system creates a balance between safe custody and rehabilitation of offenders. Increased access to needs-based rehabilitation programmes will provide offenders with programmes and interventions to facilitate their rehabilitation enhance their moral fibre and enable their social reintegration. Rehabilitation programmes are designed to improve the education, skills competencies and well-being of inmates. The implementation of these programmes is continuous and consistent through the transition of the inmate from incarceration through to their reintegration into the community.

Correctional Programmes are rendered in line with the identified needs in the Correction Sentence Plans (CSPs) of offenders serving sentences of longer than 24 months as stipulated in Section 41 of the Correctional Services Act (Act No. 111 of 1998, amended) and paragraph 9.7 of the White Paper on Corrections. Correctional Programmes are needs based programmes targeting the offending behaviour. The programmes aim to raise awareness, providing information and assisting the offender to develop and improve their life skills. Offenders will receive group work for correctional programmes dependent on the lockdown restrictions. At Level 3 restrictions, only 6 - 8 offenders will be allowed into a group session which will subsequently increase to between 8 - 10 offenders during Level 2 which then resumes as normal as restrictions are further eased. This is still however dependent on the level of regulations that are in place at a given time and on the situation in the respective correctional facilities to accommodate offenders in a group work session. The Department plans to maintain 80% of sentenced

offenders with CSPs who complete correctional programmes as from 2021/2022 until 2023/24 while observing social distancing requirement for the safety of officials and inmates.

Skills Development focuses on providing offenders with market related skills that contribute to their self-employability and reintegration into society upon release. The skills provided are inclusive and are offered indiscriminately where youth, women and people with disabilities participate in programmes when they meet the admission criteria. Offenders must have the literacy proficiency equal to NQF level 1 to access skills development programmes. Female offenders will be provided with among others, bricklaying and plastering and welding skills by gualified officials. The provisioning of skills development to offenders is dependent on stakeholder involvement and support from the DHET, NSF and various SETAs. The Department offers TVET college programmes as per directives issued by DHET and is dependent on them for the provisioning of TVET college programmes and partnerships with local TVET colleges. The NSF and the SETAs provide financial support to offer skills programmes and provide accreditation of offender workplaces. Hair salons at the Female Centres in Pollsmoor, Durban Westville, Breederivier and Bizzah Makhate will be registered as accredited training Centres to expand the skills training within the Department. This expansion of different criteria of occupational skills training, will enable the Department to ensure predetermined performance of 90% over the MTEF period. This increases the employability opportunities for offenders upon release from the facilities.

The Department offers the educational programme with the aim of using education in the form of Adult Literacy (GET) and the academic stream (FET) to better prepare offenders for adaptation in the community as well as for the life of work after they leave our facilities. The academic curricula stream caters for those who do not wish to follow the vocational and technical streams of curricula. The Department will continue working with the DBE and the DHET to better influence the quality and preparation of the educators and ultimately, the learners, in the respective subject areas. The Department will continue to invest in developing the capabilities of offenders which extends from educational programmes through to skills development which responds to Priority Three: Education, Skills and Health.

The Department is committed to increasing learner participation in the FET band and ultimately obtain an increased number of offenders who receive a NSC on successful completion of Grade 12, as a requirement for improving economic growth and reducing income inequality in South Africa. The Department must give consideration to the disruptions caused by COVID-19 on the delivery of education programmes to offenders. The planned targets of 76% for the Grade 12 pass rate has been retained for the 2021/22 financial year with a gradual increase over the MTEF. The Department will continue with efforts to ensure that offenders realise the importance of obtaining a GET certificate as a gateway to FET. AET level 4 or Grade 9 (the last grade of the GET band of the curriculum) is the minimum education level required for offenders to pursue or enter into further education learning programmes and or accredited skills development courses. The achievement of this programme will assist in improving literacy levels among inmates resulting in the successful completion of the FET from Grades 10 to 12. The planned performance is maintained at 80% over the MTEF mindful of the adjusted operating environment resulting from the application of COVID-19 regulations.

Processes are underway to use technology in the classroom to enhance teaching and learning that will further enhance performance. There is a need to incorporate monitoring and support to full time schools to ensure that more learners are recruited, maintaining high levels of efficiency and improved classroom practices. Further planning includes improving the professionalism, teaching skills, subject knowledge and computer literacy of educators to adapt to e-learning practices that will be monitored as key enablers of this output. The Department aims to build on the current successes to ensure that offenders are given access to and participate in the offered programmes.

The operations of production workshops and agriculture are labour and capital intensive. The Department has identified workshops and agriculture sites to target for increased investment in terms of funding and resource provision with the aim of increasing self-sufficiency and sustainability in an effort to reduce government spending over the medium- to long-term. Therefore, the ability to deliver on production workshops and agriculture services depends on investment on capital, infrastructure development, machinery and equipment, technology and human resources, as well as support services from I stakeholders. The widespread budget pressures will reduce the required investment and subsequently the delivery of services in this regard. The produce from agriculture, bakeries and workshops contribute towards self-sufficiency, cost savings and revenue generation. The work opportunities in production workshops and agriculture contribute towards offender development, skills utilisation, and enhancement of work ethics as well as social functioning of offenders, so that upon their release they may be self-sustained and contribute towards economic growth. The Department embarked on the manufacturing of cloth face masks for inmates, in an effort to reduce the spread of COVID-19, the targeted performance level is 85% across the MTEF period. The building and strengthening of strategic partnerships in line with the White Paper on Corrections recognises rehabilitation as a societal responsibility particularly at a time of severe financial constraints.

Improved accessibility of needs-based rehabilitation programmes to offenders, parolees and probationers enhances their rehabilitation and successful placement into society after their lawful release. A needs-based rehabilitation approach ensures the holistic provision of appropriate services and programmes for special categories of inmates, parolees and probationers such as children, youth, women and PWDs. The Department plays a vital role in rehabilitating offenders and reducing the likelihood of reoffending by conducting proper assessments and informing them about the programmes and interventions available within correctional facilities to address their criminogenic needs. These, among others, include Social Work Services, Spiritual Care Services and Psychological Services. The Spiritual Care Services' performance in 2020/21 was negatively affected by COVID-19 lockdown regulations which prohibited spiritual workers, volunteers and service providers to access correctional facilities. Taking into account the impact of COVID-19 pandemic on service delivery and the current level of performance for spiritual care, the projected target has been lowered to 62% for 2021/22 whilst offenders, parolees and probationers receiving social work services steadily increases to 54% and inmates receiving psychological care services increases to 21% with a gradual increase over the MTFE.

100 Department of Correctional Services

7.3.6 Resource contribution to the achievement of outputs for Programme 3

The Rehabilitation programme is expected to spend R6.830 billion over the medium term, which is 8.7% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 6.5% and is expected to increase over the medium term to 2023/24 by 5.5%. The Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Rehabilitation programme. The bulk of this decrease was against the Compensation of Employees budget which decreased by R336,8 million over the medium term. The remainder of the budget cuts which were against Goods and Services items under this programme such as Consumables: stationery and printing and Subsistence and Travel due to the use of electronic media to convene meetings, workshops etc.

Over the MTEF period, this programme will continue funding rehabilitating interventions which should be viewed not merely as a strategy to prevent crime, but rather as a holistic phenomenon incorporating and encouraging social responsibility, social justice, active participation in democratic activities, empowerment with life and other skills that contributes to making South Africa a better place to live in. Rehabilitation programmes include correctional and skills development programmes, psychological, social and spiritual care services. Through the improved marketing of skills development programmes and the appointment of external service providers will increase training opportunities for offenders over the MTEF period. The full participation of offenders in rehabilitation programmes is significant because specific rehabilitation needs for every offender are identified.

An estimated 73.2% (R5 billion) of the Rehabilitation programme is allocated for spending on Compensation of Employees. The remaining 26.8% (R1.8 billion) of planned spending is allocated for supplies at various sites, including farms and production workshops where work opportunities are provided to offenders, such as at agriculture projects, abattoirs, bakeries, textile, shoe factory as well as wood and steel workshops. An additional amount of R87,2 million has been allocated over the medium term for the replacement of workshop and agricultural equipment. Rehabilitation and corrections will require working together effectively within the framework of integrated governance

7.4 Programme 4: Care

7.4.1 Programme purpose

Provide needs-based care services for the personal wellbeing of all inmates in the Department's custody.

7.4.2 Programme outputs and medium-term targets for 2021/22 – 2023/24

Annual Performance Plan 2021-2022

7.4.4 Explanation of performance over the medium-term period

The COVID-19 virus has, by February 2021, infected more than 100 million people globally. More than two million have died from the disease, however, it is likely that this number is far higher. With a global average mortality of about 2%, the tragedy is incalculable. The pandemic has caused a strain to the resources and capacity across the Department. Clinical strategies to deal with the virus and curb its spread had to be speedily implemented. The Department will maintain measures to avoid mass outbreaks within correctional facilities through the strict observance of prevention and protection measures supported by regular screening, testing and wearing of masks. All the necessary preventative measures will be taken to ensure health and safety within correctional facilities, while prioritising and protecting inmates and officials. The protection of officials becomes critical in this regard as the main interface between the communities and the inmates. Containment and symptomatic treatment protocols will be activated for the confirmed COVID-19 cases (those who tested positive for COVID-19 are isolated and close contacts guarantined) to manage the spread of the virus. Healthcare teams will be on site rendering care services to inmates and monitoring those likely to develop related COVID-19 symptoms.

The Department as a PHC institution will manage mild COVID-19 cases and refer moderate and severe cases to the DoH for secondary and tertiary levels of care. Partnerships will be strengthened with the DOH, NICD and WHO to ensure that the Department is kept abreast with the latest developments in COVID-19 management particularly with the possible emergences of other waves of infections. The Department will continue with the testing of identified inmates over the MTEF and maintain an 85% recovery rate. Collaboration with the relevant stakeholders in the delivery and provision of guality healthcare services and programmes to the inmate population is critical in ensuring that the Department's constitutional mandate of ensuring the humane detention of inmates is achieved. Prevention and management of communicable and

non-communicable diseases therefore decrease morbidity and mortality, improve life expectancy and contributes to the achievement of a healthy incarcerated population in line with the MTSF Priority Three: Education, Skills and Health.

In order to comply with international standards, national DoH and Departmental legislation and policies, the Department is obliged to provide services that will improve the health status and life expectancy of the incarcerated population through combating HIV, TB, STIs and other acute and chronic conditions. The set medium-term targets for 2021/22 - 2023/24 aligns to the targets of the DoH, i.e. offenders viral load suppression rate (at 12 months), offenders TB new pulmonary cure rate will increase to 91% and maintained over the MTEF. It has become evident that adherence to antiretroviral treatment for people living with HIV results in viral load suppression which strengthens the immune system and decreases opportunistic infections such as TB, cancer and pneumonia amongst others thus improving the guality of life. Testing for communicable diseases (HIV, TB, COVID-19), and screening for non-communicable diseases (diabetes, hypertension, cancer) ensures early detection and initiation of relevant health interventions to improve prognosis and treatment outcomes. The inmates screened for diabetes and hypertension will be maintained at 90% whist the therapeutic diets prescribed for inmates are maintained at 12% over the MTEF.

7.4.6 Resource contribution to the achievement of outputs for Programme 4

The Care programme is expected to spend R7.69 billion over the medium term which is 10.1% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 3.3% and is expected to increase over the medium term to 2023/24 by 1.1%.

The Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Care programme. The bulk of this decrease was against the Compensation of Employees budget which decreased by R81,5 million over the medium term. The remainder of the cuts were made against Goods and Services items under this programme largely under Inventory: Food and food supplies as well as Inventory: Medicine in line with recent expenditure trends.

The Care programme continues to fund nutritional, health and hygiene services, over the MTEF period, including additional expenditure for COVID-19 treatment. Funds were reprioritised for COVID-19 within this programme from Nutritional Services to Health Care Services - Inventory Medical Supplies. Departmental specific Standard Operating Procedures (SOPs) are utilised together with other SOPs and Guidelines from the Department of Health (DoH), National Institute for Communicable Diseases (NICD), Centre for Disease Control (CDC) and the World Health Organization (WHO) as mitigation strategies that are implemented to prevent, detect and respond to COVID-19. The Department has a responsibility to care for inmates in a manner that does not violate or compromise their constitutional rights. The right to health care or right to access to health care is one such right. The Department must provide, within its available resources, adequate healthcare services, based on the principles of primary health care, in order to allow every inmate to lead a healthy life. Spending over the MTEF period will be to ensure that inmates continue to receive comprehensive health and hygiene services during their period of incarceration as well as appropriate nutritional services which includes therapeutic diets prescribed to inmates as required.

7.5 Programme 5: Social Reintegration

7.5.1 Programme purpose

Provide services focused on preparing offenders for release, effective supervision of offenders placed under the system of community corrections and facilitation of offender social reintegration into communities.

7.5.4 Explanation of performance over the medium-term period

The rehabilitation of offenders and their successful reintegration into society must be a priority within the CJS and society at large, as part of crime prevention. Community Corrections is a core component of the South African CJS which provides an alternative to incarceration and services and interventions that contributes to the reintegration of offenders as law abiding citizens into communities by ensuring that parolees and probationers are rehabilitated, monitored and accepted by communities. The Department continues to ensure that rehabilitation programmes that leads to offenders, parolees and probationers exiting corrections with relevant skills for work opportunities and becoming productive citizens and successful reintegration programmes are implemented for a smoother transition of offender reintegration back into communities. Key to rehabilitation is involving offenders, parolees and probationers in productive activity while they serve their sentences so that they function effectively upon their release. Offenders are empowered with the necessary skills in order to have gainful employment and prevent recidivism.

All offenders must be considered for placement under community corrections when they have completed the stipulated minimum of the sentence. The Correctional Services Act (Act No.111 of 1998, as amended) allows the Department to consider offenders for release on parole after serving a portion of their sentences. A certain portion of their sentence is then served outside correctional centres under the auspices of community corrections and more responsibility is given to the community to ensure successful reintegration. In enhancing public safety, social reintegration ensures effective administration and supervision of offenders placed under correctional and parole supervision. Parolees and Probationers are being educated about their community corrections conditions to ensure compliance with the set conditions. Over the MTEF period, the Department will ensure that 97% of parolees and probationers have no parole or supervision violations.

To ensure the successful reintegration of offenders into communities, all parole considerations should include victim participation that provides a platform for dialogue, which contributes to healing and restoration. Offenders at correctional centres will participate in Restorative Justice processes before consideration by the CSPB. Victims will continue to be afforded an opportunity to participate in CSPB meetings. The Department will continue to place victims at the centre of its rehabilitation and reintegration programmes.

The Restorative Justice Programme needs to be strengthened to ensure that more victims of crime are prepared to participate in the programme. Together with the other JCPS departments, the Restorative Justice processes will continue to strengthen the victim and community in the fight against crime, as it is essential that offenders are encouraged to reconcile with the people they have offended. Restorative justice processes and other mediated interventions, starting while the offenders are still in correctional facilities, can help them find their place in the community. It is fundamental in restoring relationships broken by the commission of crime. The outputs in this programme are meant to contribute to the attainment of Outcome 4: Successful reintegration of all those under the care of the Department as well as to MTSF Priority Six: Social cohesion and safe communities. VODs will allow communication between the community and the offender so that the community gains an understanding of the crime and the causes thereof.

The Department will have 3 500 victims and 2 500 offenders, parolees and probationers participating in Restorative Justice processes which is expected to increase by 1 200 victims and 1 000 offenders, parolees and probationers over the MTEF. The output determines the extent to which offenders were actively involved in restoring relationships with their secondary and primary victims. The impact of the COVID-19 pandemic and lockdown restrictions has impacted heavily on the implementation of the Restorative Justice Programme which is suspended during lockdown Level 1. In ensuring an increase

in participation of victims of crime in the Restorative Justice processes, the Department will ensure that Social Auxiliary Workers are appointed to trace and prepare victims of crime for participation in the Restorative Justice Programme.

The majority of offenders, parolees and probationers worldwide come from economically and socially disadvantaged backgrounds and are faced with the challenge of amongst others, stigmatisation, substance abuse, unemployment and rejection by communities. These factors contribute to the breaking up of their families and drug and alcohol abuse. On release many of the parolees and probationers find it difficult to find sustainable employment because of several impediments, the circumstance affect an offender to an extent that one resort that going to a correctional centre becomes an option. The criminal records status creates a challenge for offenders to secure formal and stable employment and for their smooth reintegration into communities. Intervention has to be applied to assist offenders, parolees and probationers to obtain sustainable employment.

Over the medium-term period, the Department will continue to facilitate various economic opportunities to prepare the offenders, parolees and probationers to be economically empowered by using the skills and traits obtained during their incarceration period to venture into businesses or other forms of employment aimed at improving their livelihoods and ensuring that they live a crime free life. The sustainable livelihood of offenders, parolees and probationers is fundamental to the reduction of reoffending and contributes to the safety of communities.

The COVID-19 reality has made it difficult to actively conduct visits with potential future employers. The Department will continue enhancing relations and collaboration with the business sector to create jobs opportunities. The economic constraints has affected the job market - however, the Department will focus on creating 36 economic opportunities facilitated for offenders, parolees and probationers. The challenges faced by offenders, parolees and probationers can only be demystified by them giving back to the community through their participation in community initiatives using the skills acquired during incarceration. This helps them to repair the harm caused to the family and community. Communities have to participate in the reintegration processes from the time of offender admission to the time of release. In this way, communities will learn to understand the programmes offenders have completed and accept that parolees and probationers have corrected their offending behaviour. It is critical that participation be a mutually agreed upon process between the communities and parolees and probationers.

The involvement of parolees and probationers in community work initiatives will provide them with income opportunities, job opportunities, community upliftment and building new relationships among participants whilst facilitating their re-integration into their communities. It will also enable them to resist returning to a life of crime and will be seen as a form of public apology and an expression of remorse to the community members who were once negatively affected by their criminal activities. In this way, participation in the community work initiatives will decrease their risk of reoffending as the work encourages them to think about the wellbeing of others, which is an element that is usually lacking when crime is committed.

The targeted performance is 6 200 in 2021/22 financial year and increase by 200 each year over the MTEF.

The Department endeavours to strengthen the relationships with stakeholders involved in community initiatives and economic opportunities to facilitate the successful reintegration of offenders back into society. Corrections is a societal responsibility, hence the Department requires the involvement of other stakeholders to perform its function successfully. The Department will enhance existing strategic partnerships and establish new partnerships with Government departments and entities, business sector civil society organisations, non-profit organisations and tertiary institutions to advance its projects and programmes. Active engagement of the community in the rehabilitation process of the offender as a collective responsibility strengthens partnerships in the correcting, development and care of the offender and leads to a change in the community's attitude towards offenders, parolees and probationers. The initiative to involve offenders, parolees and probationers in community initiatives and enhance the employment of parolees and probationers has to be a collective efforts across government and society at large.

7.5.6 Resource contribution to the achievement of outputs for Programme 5

The Social Reintegration programme is expected to spend R3.557 billion over the medium term, which is 4.5% of the total vote allocation. The average growth rate of this programme from 2017/18 to 2020/21 was 3% and is expected to increase over the medium term to 2023/24 by 3.9%. The Cabinet approved budget cuts to the baseline allocation of the Department resulted in a decrease in the overall budget of the Social Reintegration programme. The net decrease against the Compensation of Employees budget of the programme was R6,4 million over the medium term.

The programme provides for the continuing supervision and support of parolees which is integral to community safety and reducing reoffending. One of the key factors for successful reintegration is ex-offenders accessing supportive structures to meet their individual needs after release – including initial financial support for basic necessities, opening opportunities for gainful and meaningful work, and possible access to employment or markets for small businesses. The JCPS and Social Clusters, other governmental entities and community-based organisations all have important roles to play in jointly addressing some of the challenges associated with the development, management and evaluation of social reintegration programmes.

Offender reintegration programmes are more effective by facilitating restorative justice methods. Parole considerations include victim participation that provide a platform for dialogue between offenders and victims that will contribute to healing and restoration. The Department plans to facilitate Restorative Justice processes by increasing the number of victims involved in dialogues with offenders from 3 500 in 2021/22 to 4 700 in 2023/24. These dialogues are budgeted for in the Community Reintegration sub-programme, with an allocation of R199.2 million over the MTEF period. A total of R3.2 billion (90%) of budget of the programme is earmarked for Compensation of Employees because of the labour intensive nature of the work in this programme.

Part D Links to other Plans

8. Updated Strategic Risk Register

120

Table 20: 2021/22 Updated Strategic Risk Register

Treatment Plan	 Review Gang Management Strategy and optimise utilisation of technology to enhance safety and security (CCTV) cameras, body scanners, drones etc.) Redesign security model and resuscitate ISS project and put in place maintenance contracts for security installations. Review and approve the appropriate shift systems after sufficient staffing has been provided (capacitated Management Area and Corrections Centres). Establish the security operations effectiveness task team guided by the National Operations Committee to deal with security-related gaps within the entire Department. Development of national monthly security breaches as and when they are identified. Establishment of a specialised intelligence matters at management are identified. Establishment of specialised intelligence matters at management areas, including centres (data analysts, etc.). Procurement of security equipment for Management Areas as per Procurement Plan.
вке	16
Current controls	Usage of National Response teams in case of critical needs. Emergency Support Teams are available to critical management areas and are deployed as and when need arise. Operation Vala implemented annually. Regular visits are conducted at management areas to review security compliance. Offenders are assisting with provisioning of critical information that assists in improvement of Security. Replacement of ICT infrastructure through cabling and switches. Procurement of new servers and computers. Implementation of anti-virus solution.
	20
ิยม	
Consequence	 High security breaches and incidents such as escapes, assaults, unnatural death. Increase smuggling of contraband into correctional facilities. Uncontrolled access to all correctional facilities, offices and on information systems.
Root Cause	 Ineffective implementation of gang management strategy. Dilapidated infrastructure not meeting the security standards i.e. access control. Dysfunctional security systems due to lack of maintenance. Inappropriate official to inmate ratio (shift pattern placing further burden on security resources).
Risk Description	Inadequate security and safety systems for inmates.
Strategic Outcome	Outcome 1: Improved safety and security of inmates, officials, stakeholders, assets and information.
.oN	। ४S

Treatment Plan	 Development of MISSTP. Continuous rolling-out of IIMS. Procurement of internal firewall and backup solutions. Upgrading of operating systems. Continuous replacement of ICT infrastructure for prioritised sites (23).
вве	20
Current controls	 Replacement of old infrastructure on the prioritised sites. Rolling out of IIMS Implementation of anti-virus solutions.
ียม	25
Consequence	 Poor service delivery. Unreliable Information/ data. Data breaches and data security compromise.
Root Cause	 Old IT infrastructure (cabling, switches, routers and servers). Outdated and vulnerable ICT software. Under-utilisation of business systems results in unreliable information/data. Delays to complete IIMS project.
Risk Description	Inadequate ICT to enable the Department to have reliable, secured, integrated business systems and infrastructure.
Strategic Outcome	Outcome 1: Improved safety and security of inmates, officials, stakeholders, assets and information.
.oN	2 8 S

Treatment Plan	 Improve case management processes of offenders (admission, detention, placement and release) Modernisation and processes re- engineering at every entry -point across the value chain propelled by the 4lR. Improve collaboration with JCPS Cluster partners. Promote the use of diversion programmes as a sentence option for certain crimes in collaboration with DSD and DoJ&CD to reduce awaiting trial population and freeing bed-space for sentenced offenders. Implementation of electronic inmate management information systems. Reviewed strategy to manage overcrowding to be developed and to replace the current multi-pronged strategy. Review the current model of the parole systems including the contracts.
вве	9
Current controls	 Manual processes in place. Records Management Framework.
ียม	20
Consequence	 Inadequate profile reports. Delayed consideration of offenders for parole placement. Inconsistencies in decision making by CSPBs. Inconsistencies Inconsistencies Inconsistencies Litigations. Litigations. Litigations. Constant increase of overcrowding.
Root Cause	 Outdated admission and release systems (utilisation of manual systems). Lack of integrated criminal justice information and management systems (SAP 62, SAP 69C and sentence remarks) - CMC, Parole Board and NCCS). Lack of Integrated planning within the JCPS Cluster. High inmate population with insufficient bed space. No control over the influx of both remand detainees and sentenced offenders.
Risk Description	Inadequate case management systems and processes.
Strategic Outcome	Outcome 2: Improved case processes of inmates.

Risk Description Inadequate and unintegrated strategies to drive and improve the self-sufficiency within the Department.
Strategic Outcome High- performing ethical organisation. Improved access to rehabilitation and developmental interventions.

Treatment Plan	 Reconcile offenders, parolees and probationers with their families / communities through enhancement of partnerships with community safety forums, National House of Traditional Leaders and councillors. Establishment of formal partnerships with other government departments (SAMA, DTIC, Agriculture, Home Affairs, and SARS etc.) to assist and support offenders on business start-up packages (company registrations, funding applications and other business skills developments). Strengthen internal collaboration to 	
вве	<u>ರ</u>	
Current controls	 Policy and policy procedures available. Social reintegration programmes. Stakeholder management. 	
ิชม	5	
Consequence	 Reoffending resulting in overcrowding. Reputational damage to the Department. Rejection of offenders by families and communities. 	
Root Cause	 Regular research, benchmarking and alignments not regularly conducted and effected. Non-availability of proper integrated departmental, stakeholder strategy on re- integration of offenders. Poor awareness and marketing 	strategy on re- integration of offenders. 4. Lack of proper support structures from the policy drivers and developers. 5. Uniformed, standard and outdated correctional programs provided to inmates.
Risk Description	Ineffective re-integration processes and systems.	
Strategic Outcome	Outcome 4: Successful reintegration of all those under the care of the Department.	
.oN	9 \US	

Treatment Plan	 Procurement of mobile facilities to increase pharmacies in all Management Areas to ensure accessibility of medicines and other medical supplies. Development of DCS-specific staffing norms for all cadres of health care professionals/service providers. Strengthen partnership with stakeholders (DoH) for assistance with provisioning of services in areas where the critical operational gaps were identified. Continuous awareness on communicable and non-communicable diseases across the DCS centres on monthly and quarterly basis. Development of a long term strategy on health care provisioning supported by capacity and resources which includes management areas. Consultation and engagements with DoH for exemptions of inmates from being treated as private patients. Implementation of Infection and Prevention Control Strategy for inmates and employees for communicable diseases or outbreaks.
вяе	16
Current controls	 Utilisation of available resources (manual health information system, Integrated TB/HIV System (THIS), human resources, finance). Referral to DoH for secondary and tertiary levels of health care. Stakeholder collaboration.
ิยม	50
Consequence	 Increase in spread of communicable diseases such as COVID-19, TB and others resulting in deaths within DCS facilities. Litigations as a result of increased infection within the DCS facilities.
Root Cause	 Limited number of pharmacy facilities to increase accessibility of medicines and other supplies. Unavailability of an integrated electronic health information system. Unavailability of departmental specific staffing norms for health care professionals/ service providers. Inadequate prevention, containment and mitigation measures.
Risk Description	Inadequate provision of a comprehensive package of health care services to inmates.
Strategic Outcome	Outcome 5: Healthy population.

Treatment Plan	 Monthly and quarterly budgets monitoring meetings to track and monitor the spending plans for the Department. Availabilty and usage of IYM tools to monitor the budget spending Monitoring the implementation of financial circulars issued on usage of budget. Stringent budget management and enhancing self-sufficiency (enhance offender labour practice) Request National Treasury to be exempted from paying over funds made by DCS resources (Farms, workshops) to fund additional programs. Utilization of funds received from production workshops to fund additional programs within the department through the self-sufficiency program. Alternative sources of funds from SETAs, NSF, CARA Enhance utilisation of services from partners for programmes
вве	<u>1</u> 0
Current controls	 Implementation of budget reprioritization and circulars. Utilization of funding from external funders for other critical programs. Utilisation of services from partners to support service delivery
ิยม	50
Consequence	 Poor service delivery. Inability to meet financial obligations. Reduction of budget allocation by National Treasury. Reputational damage
Root Cause	Poor internal controls within the supply chain processes. Inadequate monitoring of expenditure for projects Negative economic outlook. Non spending of budget allocated to the branches Insufficient budget allocations
	· · · · · · · · · · · · · · · · · · ·
Risk Description	MTEF budget cuts on vote allocations to DCS
Strategic Outcome	Outcome 6: High performing ethical organisation.
.oN	8 JS

Strategic Outcome	Risk Description	Root Cause	Consequence	ิยม	Current controls	вяв	Treatment Plan	
Outcome 6: High performing ethical organisation.	Inadequate structure to support the departmental needs and mandate.	 Misalignment between organisational structure and operational needs. Dependency on of the reviewed structure. Lack of control by HR planning to review the structure. Instability of leadership and continuous change of DCS vision 	 Poor service delivery Lowering performance targets, Reputational damage and increased litigations. 	25 1	 Usage of contract workers to augment the current operational needs. Usage of partners and other stakeholders in the interim on critical service while waiting for finalisation of structure. 	20	 Alignment of structure in accordance to operational needs through process mapping project which is currently in the advanced stage Consultation with National treasury for funding of developed structure. Ensure approval of reviewed structure that is aligned to the operational needs through timeous consultation with internal and external stakeholders. 	

	ى ب
Treatment Plan	 Review promotion policy to address vacant posts which are abolished and converted to entry level post. Change training strategy for new intakes from learnership program (12 months training). Review the recruitment strategy to cater for proper coverage of critical gaps identified.(Retention, recruitment, promotion) Review, benchmarking of succession plan and strategy for the Department for alignment with other justice cluster departments (e.g. SAPS). Develop and implement organisational change management strategy/ approach to Improve the organisational culture.
вяе	$\widetilde{\omega}$
Current controls	 In-house training of officials for skill transfer. Continuous advertisement and recruitment of critical funded posts. Decentralized recruitment processes to Regions and Management Areas.
ียม	20
Consequence	 Poor service delivery Low staff morale Poor performance by the Department, the Department, by National Treasury Reputational damage
Root Cause	 Non availability of a proper succession plan which is implementable for the entire Department. Lack of structured recruitment plan. Internal promotion due to OSD requirement (90% of appointments) at management area level which increase vacancy rate. Halt or non- continuity of training colleges. Learner ship programme (which requires SARSETA confirmation) delays the appointment of new recruits. Aged workforce due to retire in the short space of time. Bureaucratic and authoritative style of management
Risk Description	High staff turnover (staff shortage).
Strategic Outcome	Outcome 6: High performing ethical organisation.

Part E Technical Indicator Descriptions

11. Technical Indicator Descriptions

11.1 Programme 1: Administration

Sub Programme Management

Key Performance Indicator: 7.1.3.1

Outcome	High performing ethical organisation.							
Indicator title	Percentage of inv	vestigations comp	oleted for repo	ted allegations.				
Definition	The indicator is measuring the finalised investigations on allegations of corruption, fraud, theft and maladministration committed by correctional officials. These are investigations finalised as closed due to lack of evidence or unfounded allegations or referred to Code Enforcement for further handling.							
Source of data	Complaints or alle emails.	gations reported vi	a the Public Ser	vice Commission, v	walk-ins, letters, fax,			
	Statistics of compl case files/excel spi	0	s on a monthly, o	quarterly and annu	al basis using registers/			
Data collection	The data is collected	ed from the Registe	ers (complaints/	CE/Inquiries and cl	losed cases).			
Data collection	All registers are ke	pt at DIU which is b	based at Head C	ffice.				
Method of calculation	Number of cases f	inalised x 100						
/ assessment	Total number of open cases							
Unit of measure	Percentage.							
Data limitations	System error where the registration of complaints will be duplicated and human error where officials capture incorrect/ambiguous information on electronic database or excel spreadsheet.							
Assumptions	Availability of witnesses willing to testify.							
Assumptions	Adequate capacity and budget.							
Disaggregation of beneficiaries (where applicable)	Investigations are conducted consistently across all designated groups.							
Spatial transformation (where applicable)	National.							
Calculation type	Cumulative year to date (previous quarterly target added to the next quarter to eventually add up to the annual target).							
Reporting cycle	Quarterly.							
New indicator	No.							
Desired performance	All investigations completed within the planned timeframes.							
Indicator owner	Director Departmental Investigation Unit (DIU).							
Indicator updater	Director Departmental Investigation Unit (DIU).							
	2021/22	2022/23	2023/24	2024/2	5 2025/26			
Annual targets	2021/22 2022/23 2023/24 2024/25 2025/26 50% 55% 60% 60% 60%							
Quarterly targets	Quarter 1	Quart	er 2	Quarter 3	Quarter 4			
2021/22	13%			40%	50%			
Means of verification	Statistics of completed investigations on a monthly, quarterly and annual basis using registers/ case files/excel spreadsheet.							

Key Performance Indicator: 7.1.3.2

Outcome	High performing et	hical organisation.					
Indicator title	Percentage of office	cials charged and	found guilty	for corrupt activitie	s.		
	the Department i.e.	successful prosec section 95A and E	ution and guilt	o are found guilty of c y finding in disciplina ional Services Act (Ac	ary hearings of officials		
Definition	Code Enforcement (CE) Unit has a legal mandate in terms of section 95B of the CSA to initiate in disciplinary hearings based on investigations received from the DIU who are mandated to investigate theft, fraud, corruption and maladministration in terms of Section 95A of the Correctional Services Act (1998, as amended). Measuring the success rate reflects the success of the reporting, investigation and subsequent disciplinary hearing process to ensure a corruption-free Department.						
Source of data	Case-files/Excel data	abase/monthly, qu	arterly and an	nual name lists of cas	es.		
Data collection	Information is collected from the actual disciplinary hearings that are instituted in terms of section 95B by CE after investigation by the DIU in terms of Section 95A and kept on case files by CE. The case file is opened when the investigation report is received from the DIU and a case registered on the CE database. The database is updated as events take place in the hearing and name lists are compiled monthly, with the status of each disciplinary hearing handled by CE to ensure that information can be verified in future for any period in the past. This information is used for statistics. CE is a head office function only. Issues such as dismissals, suspension without salary captured on the Personnel Salary System (PERSAL) and related information can be verified where the official was stationed.						
Method of calculation	Number of officials found guilty x 100						
/ assessment	Number of officials charged for corrupt activities and hearing finalised						
Unit of measure	Percentage.						
Data limitations	Human error, i.e. officials capturing/updating information on the database about officials found guilty of corrupt activities.						
Assumptions	Availability and consistency of evidence and witnesses.						
	Adequate capacity and budget.						
Disaggregation of beneficiaries (where applicable)	Charges are instituted consistently across all designated groups.						
Spatial transformation (where applicable)	National.						
Calculation type	Cumulative year-to-end (separate targets for each quarter which adds up to the annual target).						
Reporting cycle	Quarterly.						
New indicator	No.						
Desired performance	All charges finalised with the required timeframes.						
Indicator owner	Director: Code Enforcement.						
Indicator updater	Director: Code Enforcement.						
	2021/22	2022/23	2023/24	2024/25	2025/26		
Annual targets	2021/22 2022/23 2023/24 2024/25 2 95%				95%

2021/22	95%	95%		95%	95%		
Means of verification	Statistics dorived fra	n actual name lis	tc				
means of vernication	Statistics derived from actual name lists.						

Key Performance Indicator: 7.1.3.3

Outcome	High performing ethical organisation.						
Indicator title	Number of COVID-	-19 awareness co	mmuniqu	ie issued			
Definition	The indicator measures the COVID-19 communique that are issued internally and externally to inform officials, inmates, parolees, probationers and the public of the implementation of the DCS COVID-19 Disaster Management Strategy and confirmed COVID-19 cases within the DCS. Effective communication and the timely release of information on COVID-19 in DCS contributes significantly to the managing the spread of virus and to ensure only factual information is communicated.						
Source of data	NOC Report or relev	ant branch report	•				
Data collection	The information is c	ollected by Head	Office Con	nmunicati	on and reported o	on the M&E system.	
Method of calculation / assessment	Simple count of CO	VID-19 awareness	communi	ques issue	ed internally and e	externally.	
Unit of measure	Number.						
Data limitations	Incomplete and inaccurate information on the status of COVID-19 could lead to incorrect information dissemination.						
Assumptions	COVID-19 information, activities and events will be communicated.						
Assumptions	COVID-19 information filtering across the Department is complete and accurate.						
Disaggregation of beneficiaries (where applicable)	Communication will cover all designated groups.						
Spatial transformation (where applicable)	National.						
Calculation type	Cumulative year to end (separate targets for each quarter which adds up to the annual target).						
Reporting cycle	Quarterly.						
New indicator	No.						
Desired performance	Timely communique issued on the status of COVID-19 in DCS.						
Indicator owner	Deputy Commissioner: Communications.						
Indicator updater	Director: Communications.						
	2021/22	2022/23	2023	3/24	2024/25	2025/26	
Annual targets	2021/22 2022/23 2023/24 2024/23 150 70 - -		-	-			
Quarterly targets	Quarter 1	Quarte	er 2	Qu	iarter 3	Quarter 4	
2021/22	40	40			40	30	
Means of verification	Schedule of COVID-19 releases (articles, news reports, updates) issued internally and externally reflecting the date of issue.						

Sub Programme Human Resources

	Percentage of you						
	Percentage of youth employed within the Department.						
Definition	number of officials are employed both (learnerships/interr	This indicator measures the number of youth employed within Department against the number of officials employed during the reporting period. Employment includes youth that are employed both permanently and on contract but excludes developmental programmes (learnerships/internships and apprenticeship). The Department is committed to creating opportunities for youths and in doing so will make them active participants in the South African economy.					
Source of data	PERSAL system.						
Data collection	verification and cor consolidated and v	lanagement Areas capture information on PERSAL and submit to Regional Offices for erification and consolidation. Regional Office captures its own information and submits onsolidated and verified information to Head Office. Head Office captures its own information nd consolidates and verifies all information nationally.					
Method of calculation		Number of youths employed x 100					
/ assessment	Total number of off	ficials employed wi	thin the De	partment	for the same per		
Unit of measure	Percentage.						
Data limitations	Data integrity of inf	formation on the Pl	ERSAL syste	m.			
Assumptions	Compliance with directive on youth employment.						
Assumptions	Qualifying youth will apply for advertised posts.

11.2 Programme 2: Incarceration

Sub Programme Security Operations

Outcome	Improved safety an assets and information	d security of inmates, parolees and probationers, officials, stakeholders,					
Indicator title		nates who escaped from correctional facilities.					
Definition	The indicator measures the inmates who escaped from DCS custody. The escape is recorded in the escape register as reflected in the Policy. Escape refers to any inmate, whether convicted or not who is detained in custody in any correctional facilities, or any other place defined by the Act, or hired out as labour in custody from one place or one Correctional Centre to another and succeeds in unlawfully remove himself/herself from effective control of any official(s) of the DCS, or a temporarily guarding official and who is not apprehended or re-arrested while in the process of escaping, or during hot pursuit by the above-mentioned officials is being regarded as an escape.						
	Escape Register.						
Source of data	Consolidate unlock	totals of inmate population (G253).					
	(G253).						
		es captures and verifies the escapes on the Escape Register.					
Data collection	Management Areas check, verify and consolidate escapes from the Correctional Facilities.						
	Regional Offices check, verify and consolidate escapes from Management Areas.						
	Head Office checks and consolidate escapes from Regional Offices and report on the M&E system.						
	Numerator:	Count the number of inmates who escaped as recorded in the electronic and manual escape register.					
	Denominator:	The inmate population is the unlock total (G253) as of the first day of the month following the month of reporting. Example – if progress is reported for the month of September the unlock total as of 1 October is used.					
Method of calculation / assessment		When reporting progress on the indicators for the quarter or year to date, the inmate unlock total for the first day of the month following the last month of the quarter or year to date is used.					
	Numbe	r of inmates who escaped from the custody of DCS x 100					
	Inmate population on the first day of the month following the month of reporting						
	Reported performa	nce must include three decimals after the comma.					
Unit of measure	Percentage.						
Data limitations		ing of information at correctional facilities on the source document.					
	,	eing utilised that may result in inaccurate data being captured.					
Assumptions		vironment (facilities, officials and systems) within the Department.					
	Reduced overcrow	ding.					
Disaggregation of beneficiaries (where applicable)	Safe and secure en women, PWDs and	vironment is provided to all inmates including special categories of youth, children.					

Spatial transformation (where applicable)	National.	National.				
Calculation type	-	Cumulative year-to-date (previous quarterly target added to the next quarter to eventually add up to the annual target).				
Reporting cycle	Quarterly.					
New indicator	No.	No.				
Desired performance	Safe and secure env	Safe and secure environment for reduced incidences of escapes.				
Indicator owner	Chief Security Office	Chief Security Officer.				
Indicator updater	Director: Security M	anagement Servic	es.

2021/22	0.008% 0.016% 0.024% 0.032%					
Means of verification	Escape Register and	Escape Register and G253.				

Outcome	Improved safety and assets and information	security of inmates, parolees and probationers, officials, stakeholders,			
Indicator title		ates injured as a result of reported assaults in Correctional Facilities.			
Definition	The indicator measures the inmates injured while in custody of the Department as a result of being allegedly assaulted by fellow inmates or officials. The injuries of inmates are documented accordingly in the Healthcare Registers and files.				
Course of data	G336 Register as per	Healthcare Policy and Procedure.			
Source of data	Consolidate unlock t	otals of inmate population (G253).			
	The data is collated r	nanually from the G336 registers and the daily unlock template (G253).			
	Correctional Facilitie	s captures and verifies the injury incidences on the injury register.			
Data collection	Management Areas assaults from the Co	check, verify and consolidate inmates injured as a result of reported rrectional Facilities.			
	Regional Offices che from Management A	ck, verify and consolidate inmates injured as a result of reported assaults Areas.			
		and consolidates inmates injured as a result of reported assaults from reports on the M&E system.			
	Numerator:	Count the number of inmates who allege that they have been assaulted as recorded in the G336 register. (Note: the injury must be confirmed on the G337 and recorded as such on the G336 confirmation column. The date of confirmation must be used as the reporting date on the APP). This excludes cases where the medical practitioner indicates that there are no injuries.			
Method of calculation / assessment	Denominator:	Inmate population refers to the unlock total as of the first day of the month following the month of reporting. Example – if progress is reported for the month of September the unlock total as of 1 October is used. When reporting progress on the indicators for the quarter or year to date, the inmate unlock total for the first day of the month following the last month of the quarter or year to date is used.			
	Note: Inmates who are recorded more than once in a specific month in the G336 register for injuries sustained due to assaults in separate incidents must also be counted accordingly mo than once in that month for the purposes of this indicator. Inmates injured as a result of reported assaults Inmate population on the first day of the month following the month of reporting Reported performance must include two decimals after the comma.				
Unit of measure	Percentage.				
	Inconsistent capturi	ng of information at Correctional Facilities on the source document.			
Data limitations	Manual system is be	ing utilised that may result in inaccurate data being captured.			
	Safe and secure envi	ronment (facilities, officials and systems) within the Department.			
Assumptions	Reduced overcrowd	ing.			
Disaggregation of beneficiaries (where applicable)	Safe and secure envi women, PWDs and c	ronment is provided to all inmates including special categories of youth, hildren.			
Spatial transformation (where applicable)	National.				

Calculation type		Cumulative year-to-date (previous quarterly target added to the next quarter to eventually add up to the annual target).				
Reporting cycle	Quarterly.

Means of verification	Practical Completion	on Certificate.					

Sub Programme Remand Detention

Outcome	Improved case management processes of inmates.
Indicator Title	Percentage of Remand Detainees (RDs) subjected to Continuous Risk Assessment (CRA)
Definition	The indicator measures the Remand Detainees who are in detention on the last day of the month and who have been assessed to determine their risk category. It excludes all the Remand Detainees who have been assessed during the month and have been released. The aim is to increase the Remand Detainees assessed through the use of a CRA tool for determination of risks and management thereof.
Source of data	Completed CRA tool and daily unlock total for Remand Detainees.
	Data will be collected as follows:
	(a) Facilities that detain Remand Detainees level:
	Denominator: Determine the number of Remand Detainees for the last day of the month (using the daily unlock for the first day of the next month).
	Numerator: Determine the number of Remand Detainees who have been assessed and still kept in detention on the last day of the month.
	NB: Exclude the Remand Detainees who were assessed during the month and not in detention on the last day of the month.
	Determine the number of Remand Detainees who have not been assessed.
Data collection	Complete the prescribed Remand Detention tool in the CRA demarcated area.
Data collection	Send completed Remand Detention tool to the Management Area level.
	(b) Management Area level:
	Verify and consolidate the submission from the facilities that detain Remand Detainees by completing the relevant areas in the Remand Detention tool. Send it to the Regional Office.
	(c) Regional Office level:
	Verify and consolidate the submission from the Management Areas by completing the relevant areas in the Remand Detention tool. Send it to the Head Office.
	(d) Head Office level:
	Verify and consolidate the submission from the Regional Offices and calculate the actual performance.

	(a) Detention facility level for Remand Detainees:						
	1. Determine the 3 data sets:						
	(i) The total number of Remand Detainees in detention on the last day of the month (denominator) using the data on the first day of the next month.						
	(ii) The number of Remand Detainees who have been assessed (numerator) and in detention on the last day of the month.						
	(iii) The number of Remand Detainees who have not been assessed.						
	2. Determine the percentage of Remand Detainees who have been assessed:						
	Number of Remand Detainees who have been assessed x 100						
	Number of Remand Detainees on the first day of the next month						
	Quarterly performance Sum of numerator $\div 3$ Sum of denominator $\div 3$						
Method of calculation	Annual Performance $\begin{pmatrix} Sum \text{ of } numerator \div 12 \\ Sum \text{ of } denominator \div 12 \end{pmatrix}$						
/ assessment							
	(b) Management Area and Regional levels						
	1. Verify and consolidate the submission from each centre into one tool.						
	2. Check the total numbers provided by each centre for the 3 data sets:						
	 Number of Remand Detainees on the first day of the next month – unlock total for Remand Detainees. 						
	Number Remand Detainees who have been assessed.						
	The number of Remand Detainees that have not been assessed.						
	NB: The unit of analysis in all levels is the centre, i.e., the name (s) of the centre (s) will appear in all levels in the CRA tool.						
	(c) National level:						
	1. Develop an analysis and reporting tool which will reflect monthly, quarterly and annual calculations.						
	For purposes of report on the CRA, State patients are not regarded as Remand Detainees and must not be include in the number of RDs in detention CRA on the first day of the month on Remand Detainees who were assessed.						
Unit of measure	Percentage.						
Data limitations	Data uploaded onto the Remand Detention tool not of the desired quality.						
Assumptions	There will be Remand Detainees that will not be assessed at any point in time due to the fluidity of the population.						
Disaggregation of beneficiaries (where applicable)	The Remand Detention tool is applicable to all RDs including women, youth and PWDs.						
Spatial transformation (where applicable)	National.						
Calculation type	Non-cumulative (Separate targets for each quarter or annual or bi-annual target).						
Reporting cycle	Quarterly.						
New indicator	No.						
Desired performance	All Remand Detainees subjected to CRA.						

Indicator owner	Deputy Commissio	Deputy Commissioner Remand Operations Management.					
Indicator updater	Director Remand D	Director Remand Detention Systems and Safety.					
Annual targets	2021/22	2022/23	2023/24		2024/25	2025/26	
Annual targets	65%	65%	65%		65%	65%	
Quarterly targets	Quarter 1 Quarter 2 Quarter 3				Quarter 4		
2021/22	65%	65% 65%			65%	65%	
Moons of varification	Remand Detention analysis and reporting tool.						
Means of verification	(CRA completed to	CRA completed tool).					

Sub Programme Offender Management

Outcome	Improved case management processes of inmates.					
Indicator title	Percentage of overcrowding in correctional facilities in excess of approved bedspace capacity.					
Definition	This indicator measures the population/occupation levels of inmates in correctional facilities against the total bedspace capacity. Overcrowding is defined as the excess inmate population in relation to the available bedspace capacity. Inmate facilities include all facilities admitting sentenced offenders and Remand Detainees.					
Source of data	G253: Unlock total of inmate population.					
	Accommodation Determination (ADS) System Report.					
	Correctional Facilities record occupation level of inmates and forward to the Management Area.					
	Management Area checks and consolidates information from Correctional Facilities.					
Data collection	Regional Offices checks, verifies and consolidates information from Management Area.					
	Head Office Correction Administration checks and consolidates information from the Regional Offices.					
Method of calculation / assessment	$\left(\frac{\text{Number of inmates in excess}}{\text{Approved bedspace capacity}}\right) \times 100$ Number of inmates in excess = Inmate population – bedspace capacity The unlock total as on the first day of the month must be used to report the number of inmates on the last day of the previous month in order to cater for late admissions (E.g. the unlock total on 1 February must be reported as the number of inmates incarcerated on 31 January). Example: If the number of inmates (combined number of remand detainees and sentenced offenders) is 141 457 and the approved bed space capacity is 120 567 then the excess number of inmates is 20 890, i.e. 141 457 (inmates) - 120 567 (approved bedspace capacity) = 20 890 Calculation of the overcrowding reporting format: $\left(\frac{20 890}{120 567}\right) \times 100 = 17\%$					
Unit of measure	Percentage.					
	Decentralised capturing system.					
	Delays in capturing when data lines are down.					
Data limitations	The replication delays of Admission and Release (A&R) System data to the DCS central database, which results in data being outdated and incomplete.					
	Changes not updated in the system, e.g. when a facility has been temporarily closed.					
	Data integrity of the captured information is subject to human error.					
Assumptions	Inmate population will exceed the available bedspace due to annual growth of the inmate population and the length of sentences.					
Disaggregation of beneficiaries (where applicable)	Safe, secure and humane incarceration of all inmates including special categories.					

Spatial transformation (where applicable)	National.					
Calculation type	Non-cumulative (se	parate targets for e	each quart	er or annu	al or bi-annual ta	rget).
Reporting cycle	Quarterly.					
New indicator	No.					
Desired performance	Reduced overcrowo	Reduced overcrowding to ensure a safe and humane environment.				
Indicator owner	Chief Deputy Commissioner Incarceration and Corrections.					
Indicator updater	Director Correction	Director Correction Administration.				
A	2021/22 2022/23 2023/24 2024/25 2025/26					2025/26
Annual targets	28% 30% 32% 33% 36%					36%
Quarterly targets	Quarter 1 Quarter 2 Quarter 3 Quarter 4					
2021/22	28% 28% 28% 28%					28%
Means of verification	G253: Certified ADS	G253: Certified ADS Report.				

Outcome	Improved case management processes of inmates.
Indicator Title	Percentage of offenders' profiles approved for placement by the Correctional Supervision and Parole Boards (CSPBs)
	This indicator measures the percentage of offenders' profile reports that reached the minimum detention periods and further profile dates in the reporting month that are approved for placement by CSPBs.
Definition	The indicator also measures the percentage of backlog cases where offenders' profile reports are approved for placement by the CSPBs after reaching the minimum detention periods or further profile dates.
	Profile reports approved for placements refer to decision on day parole, parole, correctional supervision and medical parole.
Source of data	G369A register for offenders' profile reports that are reaching the minimum detention period or further profile dates in the reporting month that were received and considered by the CSPBs.
Source of data	G369B register for profile reports that are considered by the CSPBs after the minimum detention periods and further profile dates are reached.
	Data is collected manually from G369A and G369B CSPBs registers.
Data collection	CSPB consolidates cases received and cases considered for the reporting period, records the profiles on the G369A or G369B registers then forwards to the Management Area. The Management Area checks, verifies and consolidates the reports of all the CSPB decisions and submits to regions. The Regional Office checks, consolidates and forward to Head Office. Head Office checks, consolidates and reports performance on the M&E reporting system.

	Numerator:	Number of offenders' profile reports that are approved for placement by the CSPBs (only cases that reached the minimum detention periods and further profiles in the reporting month must be reported as per G369A) as well as backlog cases that were considered in the reporting month and approved for placement (as per G369B) x 100.			
	Denominator:	Number of offenders' profile reports that reached the minimum detention periods and further profile dates in the reporting month that were considered in or before as well as backlog cases that were considered in the reporting month by CSPBs as per G369A+ G369B.			
	therefore means th	to note that the profile reports are counted and not the offenders. It nat one offender may have a minimum detention period and a further profile nonth. In such case, the profile reports are counted twice.			
	It should also be n	oted that the backlog cases will also be reported as part of this indicator.			
		es on Sentence Expiry Date (SED) and further profile should not be counted but only on the denominator.			
	G306 cases (1st col (G306 is not a prof	nsideration) should not be included in cases submitted or cases considered le report).			
Method of calculation / assessment	The cases for medical parole, 276(1) (i), fine cases (287(4)(a)), must be reported in the month in which they are considered by the CSPB. However, if the 276(1) (i) is considered by the CSPB more than 30 days after completion of the minimum detention period(1/6) the case must be recorded on the G369B register as they will be regarded as backlog.				
	Cases where CSPBs only have recommendation powers, such as lifers, application for conversion in terms of section 276A(3) and offenders declared as dangerous criminals in terms of section 286A, must not be reported in both the numerator and the denominator.				
	Non- backlog cas	es (G369A)			
	Number of offende	ers' profiles with approved placement dates x 100			
	Number of off	ender profiles considered by the CSPBs			
	Backlog cases (G3	369B)			
	Number of offende	ers' profiles with approved placement dates x 100			
	Number of offe	nder profiles considered by the CSPBs			
	G369A+ G369B				
	Number of offende	ers' profiles with approved placement dates x 100			
		ender profiles considered by the CSPBs			
Unit of measure	Percentage				
Data limitations	Manual recording	of information that is subject to human error.			
	Clear recommenda	ations and motivation for CSPBs decisions.			
Assumptions	Profile reports subi	mitted on time by the CMCs.

11.3 Programme 3: Rehabilitation

Sub Programme Correctional Programmes

Outcome	Increased access to needs based rehabilitation programmes to enhance moral fibre.
Indicator title	Percentage of sentenced offenders with CSPs who completed correctional programmes
	The indicator measures offenders with CSPs who have completed correctional programme(s) per financial year against the total number of offenders with CSPs who are eligible to complete correctional programmes.
Defeition	Eligible offenders refer to offenders who have CSPs excluding those offenders in Super maximum facilities who are not allowed to attend group sessions due to high security risks.
Definition	Correctional programmes are needs-based and the needs are identified by means of the CSP, therefore the focus is on offenders with CSPs. This is in line with the correctional programmes policy and procedure.
	In the absence of an approved structure for CIOs, identified custodial officials are being orientated to facilitate correctional programmes.
Course of data	Signed attendance registers by CIO/custodial official of offenders who completed correctional programmes. Lists of offenders with CSPs who are eligible to complete correctional programmes.
Source of data	Generate a list of offenders serving sentences more than 24 months and certify how many offenders on the list are eligible for correctional programmes. Names of offenders appearing on the list who do not have CSPs or who are not eligible should be deleted.
	Information is collected manually at correctional centre level and submitted to Management Areas.
Data collection	Management Area checks, verifies and consolidates the information then submits to Regional Office.
	Regional Office checks, verifies and consolidates the information then submits to Head Office.
	Head Office checks, analyses and consolidates the submission from Regional Offices and reports performance on the M&E system.

Number of offenders with CSPs who are eligible and completed correctional programmes x 100

Total number of eligible offenders

When calculating the quarterly achievement, the denominator of the last month of the quarter should be used (not the average of the quarter). Offenders should attend only correctional programmes that are indicated in the CSP. Offenders are counted only upon completion of a correctional programme in a specific month. Pre-Release Programme statistics must not be included in these correctional programme statistics, since the pre-release statistics are reported separately

HOW TO CALCULATE AND REPORT - EXAMPLE: MONTHLY

130 offenders in correctional centres have CSPs and are eligible on 30 April. 10 of these eligible offenders have completed correctional programmes in April The report at the end of April should be:

$$\frac{10}{130}$$
 x 100 = 7.69%

HOW TO CALCULATE AND REPORT - EXAMPLE: QUARTERLY

140 offenders in the correctional centre have CSPs and are eligible on 31 May. 8 of these eligible offenders have completed correctional programmes in May. 160 offenders in the correctional centre have CSPs and are eligible on 30 June, 12 of these eligible offenders have completed correctional programmes.

The report at the end of Quarter 1 should be:

$$10 + 8 + 12 = 30$$
$$\left(\frac{30}{160}\right) \times 100 = 18.75\%$$

Method of calculation

/ assessment

Uni

Data

Ass

Disa ben app (the denominator of 160 is the actual number of eligible offenders in the last month of the quarter, June)

	April	Мау	June	Q1		
	$\left(\frac{10}{130}\right) \times 100 = 7.69\%$	$\left(\frac{8}{140}\right) \times 100 = 5.71\%$	$\left(\frac{12}{160}\right) \times 100 = 7.50\%$	$\left(\frac{30}{160}\right) \times 100 = 18.75\%$		
	Since the indicator is cumulative, Quarter 2 reporting should include the achievement of Quarter 1. Quarter 3 reporting should include the achievement of Quarter 2. Quarter 4 reporting should include the achievement of Quarter 3.					
	Always report to two decimal places and the second decimal should be rounded off. An offender is counted once in a financial year regardless of the number of correctional programmes completed. Performance is assessed based on the achievement on the set target.					
it of measure	Percentage.					
	Data lines that are not fu	unctional cause delays i	n capturing.

Sub Programme: Offender development

Outcome	Increased access to needs based rehabilitation programmes to enhance moral fibre.					
Indicator title	Percentage of offenders part	icipating in long occupational skills programme	s.			
Definition	The indicator measures offenders participating in long occupational skills programmes against the enrollments per financial year. Skills training programmes that are measured per financial year include, but are not limited to, the following delivery areas: computer skills training, entrepreneurial skills training and basic occupational skills training. The programmes are designed to provide offenders with workplace skills so that they can be economically active after their release from the care of the Department.

Sub Programme Health and hygiene Services

Outcome	Healthy incarcerated po	pulation.					
Indicator title	Offenders viral load suppression rate (at 12 months)						
Definition	The indicator measures the viral load suppression in offenders on ART at 12 months after initiation. Adherence to ART reduces viral load to an undetectable level which decreases the risk of HIV transmission. Viral load suppression does not mean a person is cured. HIV still remains in the body. Viral load suppression to undetectable level shows the success of managing HIV disease progression.						
Source of data	ART registers/Three Interlinked Electronic Registers TIER.Net or TB/HIV Integrated System (THIS) where available at correctional centre level, health file or medical records.						
Data collection	The information is recorded on the ART register/TIER.Net/THIS at correctional centre level by counting the number of offenders with viral load test results of less than 50 copies/mL (<50 copies/mL) from viral load tests done at 12 months after initiation on ART. The statistics generated is forwarded to Management Areas where it is checked, analysed and consolidated. The Management Area consolidates the received statistics and forwards to the Regional Office where it is check validated and consolidated. The Regional Office collates, analyses and sends to the National Office.

Indicator Title	Percentage of identified inmates tested for COVID-19.					
Definition	The indicator measures inmates (including babies of incarcerated mothers) within correctional facilities that are screened and tested for COVID-19 as per criteria. To meet the criteria for COVID-19 testing the inmate must be classified as a person under investigation (PUI). The testing is dependent on the applicable National and Provincial Department of Health Guidelines. If the test is positive, the Department will take the necessary steps to keep the virus from spreading to others in the correctional facility.

11.5 Programme 5: Social Reintegration

Sub Programme Supervision

Outcome	Successful reintegration of all those under the care of the Department.					
Indicator Title	Percentage of parolees without violations					
	The indicator measures parolees who did not violate their parole conditions to such an extent that parole was revoked. Section 75(2)(a) of the Correctional Services Act (Act No. 111 of1998, as amended)) provides that:					
Definition	"If the Commissioner on the advice of a Supervision Committee requests a Board to cancel correctional supervision or day parole or parole except where the person concerned was originally serving a sentence of life imprisonment, or to amend the conditions of community corrections imposed on a person, the Board must consider the matter within 14 days but its recommendations may be implemented provisionally prior to the decision of the Board."					
	"Board" referring to Correctional Supervision Parole Board and Head of Centre for sentencing less than 2 years.					
Source of data	Community Corrections system.					
	Data is captured on the Community Corrections system at the community corrections offices.					
	Information is sent to the Management Area for certification.					
Data collection	The information is sent to Regional Offices for further verification and consolidation.					
	Head Office consolidates and verifies information and reports on the M&E system.					
	The certified caseload for the last day of the month ('lock-up') x 100					
	Certification on last day of the month plus revocations for the month					
	Example: 699 (last day of the month total) + 9 (revocations) = 708					
	$\frac{699}{708}$ x 100 = 98.73%					
Method of calculation / assessment	Quarterly Performance= <u>3 months reporting added together</u> 3					
	Annual Performance= <u>4 quarters reporting added together</u> 4					
Unit of measure	Percentage.					
Data limitations	Lack of IT infrastructure.					
Assumptions	Data integrity from IT and/or a manual system.					
Disaggregation of beneficiaries (where applicable)	Parolees without violations include designated groups.					
Spatial transformation (where applicable)	National.					
Calculation type	Non-cumulative (Separate targets for each quarter or annual or biannual target).					
Reporting cycle	Quarterly.					
New indicator	No.					

Desired performance	No revocations of p	No revocations of parole conditions.							
Indicator owner	Chief Deputy Com	missioner Commu	nity Correc	ctions.					
Indicator updater	Deputy Commissic	oner Social Reinteg	ration.

Part F: Annexures to the Annual Performance Plan

12. Annexure A (Acts referenced in the Correctional Services Act, 1998, as amended)

The Correctional Services Act (Act No. 111 of 1998, as amended) references multiple Acts especially where the mandate of the Department links closely with other Government departments. These include:

Table 26: List of Acts referenced in the Correctional Services Act (Act No. 111 of 1998, as amended)

TITLE OF THE ACT	PURPOSE OF THE ACT
South African Police Service Act, 1995 (No. 68 of 1995)	To provide for the establishment, organisation, regulation and control of the SAPS; and to provide for matters in connection therewith.
Public Service Act, 1994 (No. 103 of 1994, as Amended)	To provide for the organisation and administration of the public service of the Republic, the regulation of the conditions of employment, terms of office, discipline, retirement and discharge of members of the public service, and matters connected therewith.
	To regulate financial management in the national government and provincial governments; to ensure that all revenue, expenditure, assets and liabilities of those governments are managed efficiently and effectively; to provide for the responsibilities of persons entrusted with financial management in those governments.
Public Finance Management Act, 1999 (PFMA, No. 1 of 1999)	Section 27(4) of the PFMA makes provision for the development of measurable objectives which must be included in the annual budgets of national and provincial institutions. While Section 40 (3) (a) and 55 (2) (a) makes provision for the reporting of performance against predetermined objectives in institutions' Annual Reports.
	Section 38 (d) of the PFMA states that the Accounting Officer has responsibility to manage, safe-guard and maintain assets and manage the liabilities of the department or entity, and Section 38 (a) (iv) and (c) (iii) makes a provision for a systems for evaluating capital projects and managing available working capital efficiently and economically.
The Promotion of Equality and Prevention of Unfair Discrimination Act, 2000 (PEPUDA or the Equality Act, Act No. 4 of 2000)	To give effect to the letter and the spirit of the Constitution, in particular the promotion of equality, the value of non-racialism and non-sexism; the prevention of unfair discrimination and protection of human dignity as contemplated in sections 9 and 10 of the Constitution.
Promotion of Administrative Justice Act, 2000 (No. 3 of 2000)	To ensure fair Procedure in terms of Promotion of Administrative Justice Act is discussing as follows; Sections 3 (1) provides that an administrative action which materially and adversely affects the rights or legitimate expectations of any person must be procedurally fair.
Probation Services Act, 1991 (No. 116 of 1991)	To provide for the establishment and implementation of programmes aimed at the combating of crime; for the rendering of assistance to and treatment of certain persons involved in crime; and for matters connected therewith.
Prevention and Combatting of Torture of Persons Act, 2013 (No. 13 of 2013)	To prevent and combat the torture of persons within or across the borders of the Republic; and. to provide for matters connected therewith.
Pharmacy Act, 1974 (No. 53 of 1974, as amended)	To provide for the establishment of the South African Pharmacy Council and for its objects and general powers; to extend the control of the council to the public sector; and to provide for pharmacy education and training, requirements for registration, the practice of pharmacy, the ownership of pharmacies and the investigate.
Nursing Act, 2005 (No. 33 of 2005)	To protect the public from unsafe practitioners, and the ultimate goal is competent, quality nursing care provided by qualified practitioners.
National Health Act, 2003 (No. 61 of 2003)	To provide a framework for a structured uniform health system within the Republic, taking into account the obligations imposed by the Constitution and other laws on the national, provincial and local governments with regard to health services; and to provide for matters connected therewith.

TITLE OF THE ACT	PURPOSE OF THE ACT
National Archives Act, 1996 (No. 43 of 1996)	To provide for a National Archives; the proper management and care of the records of governmental bodies; and the preservation and use of a national archival heritage; and to provide for matters connected therewith.
Mental Health Care Act, 2002 (No. 17 of 2002, as amended)	To make provisions that allows those with such impairments, others to act in their best interest and make decisions on their affairs. In this regard legislation provides for involuntary or compulsory admission to mental health facilities and involuntary treatment.
Medical, Dental and Supplementary Health Service Professions Amendment Act, 1974 (No. 56 of 1974, as amended)	To provide for the establishment of the Health Professions Council of South Africa and professional boards for health professions; to abolish the Interim National Medical and Dental Council of South Africa; to provide for control over the education, training, registration and practices of health professionals; and to provide for matters connected therewith.
Labour Relations Act, 1995 (No. 66 of 1995, as amended)	The purpose of the labour relations act is not only to protect everyone in the workplace but to also promote economic development, fair labour practices, peace, democracy and social development.
Judicial Matters Amendment Act, 2002 (No. 55 of 2002)	To amend the Magistrates' Courts Act (1944), so as to further regulate the rescission of judgments; to amend the Stock Theft Act (1959), so as to repeal certain obsolete provisions; to amend the General Law Further Amendment Act (1962), so as to make further provision for access to children under custodianship; to amend the South African Law Commission Act (1973), so as to effect a change of name; to further regulate the appointment of members of the Commission; and to further regulate requirements in respect of the reports of the Commission; to amend the Companies Act (1973), so as to further regulate the examination of directors and others during and after the winding- up of a company; to amend the Criminal Procedure Act (1977), so as to bring certain provisions in line with the Mental Health Care Act (2002); to amend the Attorneys Act (1979) so as to authorise the Attorneys Fidelity Fund Board of Control to enter into contracts for the provision of professional indemnity insurance cover; and to further regulate payments to and refunds from the Fidelity Fund; to amend the Correctional Services Act (1998, as amended), so as to effect a technical correction; to amend the Mental Health Care Act (2002) so as to amend a definition; and to provide for matters connected therewith.
Judges' Remuneration and Conditions of Employment Act, 1989 (No. 88 of 1989)	To amend the Judges' Remuneration and Conditions of Employment Act (1989) in order to provide for the remuneration and conditions of employment of the President and judges of the Constitutional Court; and to provide for incidental matters.
Institutional of Legal Proceedings against Certain Organs of State Act, 2002 (No. 40 of 2002)	To regulate the prescription and to harmonise the periods of prescription of debts for which certain organs of State are liable; to make provision for notice requirements in connection with the institution of legal proceedings against certain organs of State in respect of the recovery of debt; to repeal or amend certain laws; and to provide for matters connected therewith.
Inquests Act, 1959 (No. 58 of 1959)	To provide for the holding of inquests in cases of deaths or alleged deaths apparently occurring from other than natural causes and for matters incidental thereto, and to repeal the Fire Inquests Act (1883, Cape of Good Hope) and the Fire Inquests Law (1884, Natal).
Immigration Act, 2002 (No. 13 of 2002)	To provide for the regulation of admission of persons to, their residence in, and their departure from the Republic; and for matters connected therewith.
Health Professions Act, 1974 (No. 56 of 1974)	To establish the Health Professions Council of South Africa and professional boards; to provide for control over the education, training and registration for and practising of health professions registered under this Act; and to provide for matters incidental thereto.
Government Immovable Asset Management Act (No. 19 of 2007)	To provide for a uniform framework for the management of an immovable asset that is held or used by a national or a provincial department; to ensure the coordination of the use of an immovable asset with the service delivery objectives of a national or provincial department.

TITLE OF THE ACT	PURPOSE OF THE ACT
Health Act, 1977 (No. 63 of 1977) *	To provide for measures for the promotion of the health of the inhabitants of the Republic; to that end to provide for the rendering of health services; to define the duties, powers and responsibilities of certain authorities which render health services in the Republic; to provide for the co-ordination of such health services; to repeal the Public Health Act, 1919; and to provide for incidental matters.
Extradition Act, 1962 (No. 67 of 1962)	To provide for the extradition of persons accused or convicted of certain offences and. for other incidental matters.
Criminal Procedure Act, 1977 (No. 51 of 1977)	To make provision for procedures and related matters in criminal proceedings.
Commissions Act, 1947 (No. 8 of 1947)	To make provision for conferring certain powers on commissions appointed by the Governor-General for the purpose of investigating matters of public concern, and. to provide for matters incidental thereto.
Chiropractors, Homeopaths and Allied Health Service Professions Act, 1995 (No. 40 of 1995)	To provide for the control of the practice of [the professions of chiropractor and homeopath and] allied health professions, and for that purpose to establish [a Chiropractors, Homeopaths and] an Allied Health [Service] Professions [Interim] Council of South Africa and to determine its functions; and to provide for matters connected therewith.
Children's Act, 2005 (No. 38 of 2005)	The Children's Act (2005) governs the laws relating to the care, contact and the protection of children. It defines the parental responsibilities and rights. The Act also regulates the establishment of places of safety, orphanages and the rights of orphans and it sets out the laws for their adoption.
Child Justice Act, 2008 (No. 75 of 2008)	To establish a CJS for child accused, separate from the CJS which continues to apply for adult accused in South Africa. The Act aims to keep children out of detention and away from the formal CJS, mainly through diversion.
Social Work Act, 1989 (No. 110 of 1989)	To provide for the establishment of a South African Council for Social Service Professions and to define its powers and functions; for the registration of social workers, student social workers, SAWs and persons practising other professions in respect of which professional boards have been established; for control over the professions regulated under this Act; and for incidental matters.

14. Annexure C (Amendments to the 2020-25 Revised Strategic Plan)

The COVID-19 pandemic has impacted on the operating environment and budget of the Department. The Department of Planning, Monitoring and Evaluation has revised the 2019-2024 MTSF to support a reprioritisation of interventions, indicators and targets to address constraints resulting from COVID-19 and reduced budgets.

At the centre of managing the spread of COVID-19 is the need for social and physical distancing to slow the spread of the disease by stopping chains of transmission and preventing new ones from appearing. The mode of delivery for victim-offender dialogues within the Restorative Justice Programme is through social and physical interaction. As a result, the activities within this programme are suspended between Lockdown Alert Level 5 and Alert Level 2 in line with the Risk Adjusted Strategy of the country and the Department. The programme will be implemented from Alert Level 1 with a limited number of participants. The Department recognises the contribution of this programme towards social cohesion and safe communities and where practically possible alternative measures will be put in place to encourage victim-offender dialogues, such as use of AVR (audio/video receiver) where stakeholders indicate readiness to engage.

The Department had intended to achieve a percentage increase in victims participating in Restorative Justice process on a year-on-year basis as a one of the direct contributions to the social reintegration of offenders into communities. However, the exponential percentage increment cannot be maintained under the current COVID-19 regulations hence the output will instead measure the number of victims participating in Restorative Justice process while observing COVID-19 protocols.

NDP Chapter and MTSF	NDP Chapter 12: Building safer communities
Priority	
	Priority 6: Social cohesion and safe communities
Sub-programme	Safe communities (crime)
2024 Impact	All people in South Africa are safe
Implementation Plan and Monitoring Framework	Social reintegration of offenders
Description	Some progress has been made over the past years in reducing the levels of serious crime, such as murders, aggravated robberies, and crimes against women, children and other vulnerable groups, but they remain unacceptably high. The need to strengthen and accelerate implementation of the seven-point plan to make the CJS more efficient and effective remains a priority. Public confidence is eroded by perceptions that criminals escape the law, that arrests do not lead to convictions and that offenders escape from courtrooms and correctional facilities. Lengthy court processes, case backlogs, undue lengths of remand detention, inadequate use of diversion programmes, overcrowding in correctional centres, limited rehabilitation and well-being programmes for first and young offenders, and recidivism all remain issues requiring more coordinated and focused intervention in order to restore confidence in the CJS.
	The rehabilitation of offenders and their successful reintegration into the community are among the basic objectives of the CJS. The primary objective of social integration and reintegration is to provide offenders with the assistance and supervision that will help them function in society as law-abiding citizens and avoid recidivism. These programmes provide an opportunity for offenders to connect with their families and community and to live a productive and law-abiding life. Offenders also need to restore broken relationships caused by the crime, not only with the family and victims, but also with the local community. In order to reduce crime and recidivism, offenders need assistance to gain access to opportunities such as education and training, employment, housing, and healthcare. The continuing supervision and support of offenders on parole promotes community safety and reintegration of offenders into the community. Halfway houses provide transitional accommodation to offenders who are eligible for parole but do not have support systems in the community.
Related output indicators	Percentage of probationers without violations.
	Percentage of parolees without violations.
	Number of victims who participated in the Restorative Justice process.

15. Annexure D (Conditional Grants)

There are no conditional grants under the Correctional Services voted funds.

16. Annexure E (Consolidated Indicators)

There are no consolidated indicators for Correctional Services.
